

TRIFLUREX® HFP Herbicide

EPA REG. NO. 66222-46

FIFRA §2(ee) RECOMMENDATION For Incorporation of Triflurex HFP by Sprinkler Irrigation as a Pre-plant Soil Incorporated Treatment on Beans (Lima and Snap Bean)

FIFRA Section 2(ee) recommendation for use in CALIFORNIA

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This recommendation must be in the possession of the user at the time of pesticide application.
- Read the “Limitation of Warranty and Liability” in the label booklet for TRIFLUREX HFP before using.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by U.S. EPA.

Incorporation of Triflurex HFP by Sprinkler Irrigation

Application Methods and Recommended Cultural Practices- Pre-emergence Weed

Control: Apply the specified label rate, 1 – 1.5 pts/A depending upon soil type and organic matter content, in a broadcast spray volume of 15-40 or more gallons of water per acre. Incorporation may be accomplished through sprinkler irrigation. Incorporation must occur within 24 hours after application. Sprinkler systems should be calibrated to deliver a volume of 4- 50 gallons per hour per emitter. Apply adequate irrigation water that will allow incorporation to a depth of 2-3 inches in the seedbed.

Restrictions:

- Triflurex HFP may not be applied by Chemigation. This Section 2(ee) only allows use of sprinkler irrigation for incorporation of herbicide.
- Triflurex HFP herbicide is for preplant soil incorporation use only on Beans (Lima & Snap Bean)
- Follow all other application requirements as noted on the Section 3 Triflurex HFP herbicide label.

Triflurex HFP Herbicide is a registered trademark of Makhteshim Agan of North America.
