### 5. Fire Fighting Measures

- Extinguishing Media** : Use foam, dry chemical, carbon dioxide or water spray to extinguish. Use alcohol-type or universal-type foams on larger fires. Smaller fires should be extinguished with carbon dioxide or dry chemical.
- Specific Hazards Arising from the Chemical** : May be ignited by heat, sparks or flames. Vapors may travel to source of ignition and flash back. Containers may explode in heat of fire. Oxides of carbon may be released during combustion.
- Special Fire Fight Proc** : Wear self-contained breathing apparatus and full protective clothing. Do not use water or foam directly on the fire.

### 6. Accidental Release Measures

- Personal Precautions** : Keep unprotected and unnecessary personnel out of spill area.
- Protective Equipment** : Splashproof goggles or face shield, protective gloves, long-sleeved shirt and long pants. Use NIOSH-approved respirator suitable for propionic acid, if needed. Eyewash and safety shower should be accessible.
- Emergency Procedures** : Surround and absorb all spills. Any amount, even very small amounts, of this product combined with water is an extreme slip hazard. Do not add water until absorbent has been applied to spill.
- Methods and Materials for Containment and Cleanup** : Dike the area to prevent spreading. Spilled material should be absorbed onto an inert material and scooped up. Place in suitable containers for disposal. Flush spill area with water thoroughly until slipperiness is gone. Use absorbent to collect wash water and place in same containers with spill waste material.

### 7. Handling and Storage

- Precautions for Safe Handling** : Keep out of reach of children. Read label before use. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Take off contaminated clothing and launder before reuse. Do not contaminate water supplies. Wear protective equipment when handling.
- Conditions for Safe Storage** : Store in a well-ventilated area. Keep in original container. Keep container tightly closed. Do not reuse empty container. Do not store with food, feed or other material to be used or consumed by humans or animals. For optimal storage, store at temperatures between 40 Degrees F. and 90 Degrees F. Do not freeze.

### 8. Exposure Controls / Personal Protection

- TLV/PEL** : Petroleum distillate, hydrotreated (CAS No 64742-47-8) - OSHA PEL 500 ppm.
- Appropriate Engineering Controls** : Normal room ventilation (mechanical) or outdoor ventilation should be satisfactory.
- Personal Protective Equipment** : Splashproof goggles or face shield, protective gloves, long-sleeved shirt and long pants. Use NIOSH-approved respirator suitable for propionic acid, if needed. Eyewash and safety shower should be accessible.
