GENERAL INFORMATION

PRIMER *Select* Enhanced Matrix Flow Surfactant is a high performance soil surfactant based on the original PRIMER chemistry. PRIMER *Select* ensures uniform movement, distribution and availability of water in the rootzone and overcomes water repellency in soils. PRIMER *Select* can be safely applied to turf throughout the entire growing season.

PRIMER *Select* is recommended for use on golf courses, athletic fields and in lawn and landscape situations to enhance turf quality and the efficient use of water, labor and other inputs. Refer to Users Guide or www.aquatrols.com for more detailed information.

TANK MIXING

PRIMER *Select* can be safely applied in a tank mix with a range of commonly used turf chemicals and fertilizers at rates not exceeding 4 oz. NOTE: Tank mix combinations containing PRIMER *Select* have not been tested on all varieties of every turfgrass species or under all possible growing conditions. If user is unfamiliar with the performance of PRIMER *Select* in tank mixes under user's growing conditions, a limited area of turfgrass should be tested prior to large-scale application. The user should always exercise reasonable judgment and caution when using this and all other turf products.
