Guaranteed Analysis

Boron (B).....10%

Derived from: Boric Acid

GENERAL INFORMATION

NUE Boron 10% is manufactured specifically as a liquid foliar and water run fertilizer to help prevent and correct nutrient deficiencies that may limit crop growth and yields. NUE Boron 10% is a supplement to an adequate and balanced soil fertility program.

NUE Boron 10% is a concentrated solution of boron

It is important to monitor crop needs and responses by maintaining an adequate tissue-testing program. When unfamiliar with the effects of foliar applications of minerals it is recommended to perform small-scale field trials.

DIRECTIONS FOR USE

Mixing Directions

1. Be sure spray tank is thoroughly cleaned.
2. Fill 1/2 full with clean water and start agitation.
3. Add other nutrients if compatible.
4. Add NUE Boron 10% and continue agitation.
5. Adjust pH if necessary.
6. Add pesticides if compatible.
7. Fill tank and agitate thoroughly.

Compatibility - NUE Boron 10% is compatible with most pesticides.

For maximum nutritional results with tank mixes containing NUE Boron 10% adjust the final pH to 6.0-7.0. It is also recommended to apply foliar applications of NUE Boron 10% with a source of liquid calcium. When tank mixing NUE Boron 10% with pesticides requiring specific pH ranges, always follow pesticide label directions.

Always check compatibility with a jar test before mixing with other fertilizers (i.e. calcium). If any precipitation occurs, it may be necessary to add a compatibility agent. Consult your Bio-Gro dealer for more information.

Dilution and Spray Volumes - Always use enough water for uniform application and to prevent possible plant tissue damage to the intended crop from concentrated droplets. It is recommended to use a dilution of at least 20 parts of water to 1 part of NUE Boron 10%

SUGGESTED APPLICATIONS

Optimum rate of application will vary between fields depending on soil and/or climatic conditions, stage of crop growth and size of plants.

Application rates are best determined by soil and plant analysis recommendations.

NUE Boron 10% can be used on many crops where foliar or soil applied boron applications are commonly used. Consult your Bio-Gro dealer for specific recommendations.

WARNING: Excess amounts of boron can cause plant injury. DO NOT OVER APPLY! Always obtain Boron recommendations from your local agricultural professional or from your BioGro representative before applying

FOLIAR APPLICATION RATES

Field Crops: Apply 8 to 32 ounces/acre as a directed foliar spray during periods of rapid growth or nutritional demand once plants have reached 4-8 inches in height. NUE Boron 10% may be applied at 10 to 14 day intervals.

Vegetable Crops: Foliar rate is 8 to 32 ounces/acre. Apply NUE Boron 10% as needed throughout vegetative development and/or during rapid fruit growth.

Tree and Vine Crops: Apply 8 to 32 ounces/acre during growing season. Applications during veraison should be limited to 16 ounces /acre and used with appropriate adjuvant unless experience dictates otherwise. Repeat applications may be made in 10 to 21 day intervals.

Berry Crops: Apply 8 to 32 ounces/acre of NUE Boron 10% after active vegetative growth begins. Applications may be repeated in 7 to 14 day intervals.

SOIL APPLICATION RATES

Sidedress/Banding/In furrow: Apply at 1 to 12 quarts/acre of NUE Boron 10% directly to the soil. Soil applications of NUE Boron 10% are recommended in conjunction with a liquid calcium fertilizer. Avoid direct contact with fertilizer sensitive plant parts.

TIMING - Application timing is likely the most important factor in determining the response and value of foliarly applied nutrients. Understanding the basic physiological functions of a crop is essential in planning proper nutrient timing.

CONDITIONS OF SALE

Seller and/or manufacturer warrants only that this product consists of the ingredients specified on this label. No one is hereby authorized to make any warranty and/or guarantee concerning the use of this product. Being that the use, timing, placement, rate, application and other conditions are beyond the control of the seller and/or manufacturer, the seller's and/or manufacturer's liability for handling, storage and use of this product is limited to replacement of product or refund of purchase price.
