

Brandt[®] Boric Acid

Micronutrient Supplement

Guaranteed Analysis

Boron (B)..... 17.0%

Derived from boric acid.

F76

General Information

BRANDT BORIC ACID is a highly soluble form of boron recommended for dilute or concentrate application to all crops with a known boron deficiency, as confirmed by a soil and/or tissue analysis.

Directions For Use

Soil Applications: Apply 3-10 lbs. per acre with sufficient carrier to give complete coverage. Soil applied boron must be moved into the root zone to be absorbed by the plant. This can be accomplished by irrigation, rainfall, or tillage. Do not use where product will directly contact the seed.

Postharvest and Dormant Applications: Apply no more than 8 lbs. per acre in sufficient water for thorough coverage. Make applications in the fall after harvest, at dormant, or at delayed dormant prior to bloom.

Foliar Applications: Apply up to 5 lbs. per acre for trees and vines and up to 3 lbs. per acre for row, field and other crops. Apply with enough carrier to thoroughly cover all foliage. Early morning or late evening applications give the best results. Boron is not easily translocated within the plant, therefore multiple foliar applications at low rates during the growing season are most effective.

Compatibility: This product is compatible with many liquid fertilizers, micronutrients, and pesticides. Addition of BRANDT BORIC ACID to these products should not be done without first testing compatibility on a small scale and checking for phytotoxicity. When mixing with

pesticides, add this product to the mix tank and solutionize with water prior to the addition of buffering agents and pesticides. Follow all directions and precautions on pesticide labels prior to mixing with this product.

WARNING: BRANDT BORIC ACID is recommended for use on field, row, vegetable, fruit, tree, vine, ornamental and turf crops. Overapplication or excessive use of boron can result in boron toxicity. This may cause foliar damage or serious crop injury. The proper use of soil or petiole test recommendations will minimize the risk of overapplication of boron

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.htm>

Information about the components of this lot of fertilizer may be obtained by writing to Brandt Consolidated, Inc. and giving the lot number which is found on the container or label.

Warning: Suspected of damaging fertility or the unborn child.

Precautionary Statements: Do not handle until all safety precautions have been read and understood.

First Aid: If exposed or concerned, get medical attention. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.

Warranty: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
