Micronized Foliar Nutrient

GUARANTEED ANALYSIS

Available Phosphate (P ₂ O ₅)	24.00%
Calcium (Ca).....	20.00%
Sulfur (S)	6.00%
Zinc (Zn)	12.00%

DERIVED FROM: Calcium Phosphate, Calcium Sulfate, Zinc Phosphate, and Zinc Oxide.

KEEP OUT OF REACH OF CHILDREN

WARNING

Harmful if inhaled.

PRECAUTIONARY STATEMENTS

Avoid breathing dusts or fumes.
Use only outdoors or in a well-ventilated area.

FIRST AID

In all cases, call a poison control center or doctor for further treatment advice. **IF INHALED:** Remove person to fresh air and keep comfortable for breathing. Call a poison control center or doctor if you feel unwell.

99.49% of the mixture consists of component(s) of unknown acute inhalation toxicity.

STORAGE AND DISPOSAL

Store in a safe manner. Store in original container only and keep tightly sealed when not in use. Store product and dispose of unused product and empty containers in accordance with federal, state and local regulations.

GENERAL INFORMATION

Super-Phos 24 is a quick mixing, micronized foliar nutrient intended for use as part of a balanced fertility program. To achieve maximum benefits, recommendations must be based on tissue and soil nutrient analysis. Multiple low rate applications are generally more effective than a single high rate application.

APPLICATIONS: **Super-Phos 24** may be applied as a foliar spray by air, ground, concentrate or dilute. Applications may be made through irrigation systems if effective anti-siphon equipment is in place to prevent water source contamination.

MIXING: Fill spray tank 1/3 full of water, add **Super-Phos 24**, agitate, continue to add water and spray materials. Fully disperse **Super-Phos 24** prior to adding other spray materials. **Super-Phos 24** should disperse quickly and mix thoroughly. Speed of mixing is dependent upon water temperature and quality.

DIRECTIONS FOR USE

Permanent Deciduous Crops: May be applied as a dormant spray or as a cover spray. Apply up to 25 pounds **Super-Phos 24** per acre per application. Do not make applications in less than 10 gallons of water by air or less than 25 gallons of water by ground.

CAUTION: Do not apply to stone fruit crops within 3 weeks of harvest because of visible residue. Fruit and nut crops may be sensitive to zinc. Refer to soil and tissue analysis in order to avoid toxic accumulation of metals. Do not apply under poor drying conditions, or within 24 hours of predicted rainfall. To avoid possible fruit spotting following rainfall, do not apply **Super-Phos 24** to plums after 50% petal fall. On plums, do not use **Super-Phos 24** following a heavy application of zinc sulfate the previous winter.

Citrus: Apply up to 50 pounds per acre. Do not apply more than 3 pounds of **Super-Phos 24** per 100 gallons of spray solution when mixed with spray oil.

Vegetable and Seed Crops: 2 to 10 pounds of **Super-Phos 24** per acre per application.

Field Crops: Apply 3 to 15 pounds of **Super-Phos 24** per acre per application.

USE PRECAUTIONS

Do not apply in spray solution below pH 5.5. Always test spray tank pH prior to application.

COMPATIBILITY: **Super-Phos 24** is compatible with most commonly used fungicides, insecticides and miticides. If applied with spray oils, penetrating surfactants or oil-based pesticide formulations, consult with a crop production professional for proper rates and timing requirements for local conditions.

APPLICATION TIMING: **Super-Phos 24** is best applied prior to bud formation or flowering. Applications may be made throughout the growing season as needed.

APPLICATION RATES: Rate recommendations should be based on soil and tissue fertility analysis in concentrate applications. Do not exceed 1 pound of **Super-Phos 24** per gallon of water.
