

SAFETY DATA SHEET

DREXEL LEVEN-38[®] TOBACCO SUCKER CONTROL AGENT

Section 1: Material Identification

Product Name: Drexel Leven-38[®] Tobacco Sucker Control Agent

EPA Reg No.: 19713-105

CAS NO: 112-30-1 (n-Decanol)
28382-15-2 (Potassium Salt of Maleic Hydrazide, KMH)

Formula: C₁₀H₂₂O (n-Decanol)
C₄H₃KN₂O₂ (KMH)

Company: Drexel Chemical Company
1700 Channel Avenue
Memphis, TN 38106

Synonyms: C₁₀ Fatty Alcohol
6-hydroxy-3-(2H)-pyridazinone, potassium salt

Identifiers:

EINECS: 203-956-0 (n-Decanol)
249-000-4 (KMH)

RTECS: HE4375000 (n-Decanol)
UR5950000 (Maleic Hydrazide)

DOT label: See Section 14 – Transport Information

Emergency Telephone Number:

CHEMTREC Drexel Chemical Co.
Tel: 1-800-424-9300 901-774-4370

This product is an EPA FIFRA registered pesticide. Some of the classifications on this SDS are not the same as the FIFRA label. Certain sections of this SDS are superseded by federal law governed by EPA for a registered pesticide. Please see **Section 15. REGULATORY INFORMATION** for explanation.

Section 2: Hazard Identification

(As defined by the OSHA Hazard Communication Standard, 29)

GHS Classification:

Health Hazards:	Eye damage/irritation	Category 2B
Environmental hazard:	Aquatic acute toxicity	Category 2

GHS label elements:

Signal Word: Warning

Hazard statements:	Causes eye irritation. Toxic to aquatic life.
Precautionary statements:	
Prevention:	Wash exposed skin thoroughly after handling. Avoid release to the environment.
Response:	If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Storage:	Store in a cool, dry, ventilated and secure area designated specifically for pesticides and away from heat sources. Keep in original containers and keep containers closed when not in use.
Disposal:	If wastes and/or containers cannot be disposed of according to the product label directions, disposal of this material must be in accordance with your local or area regulatory authorities.

Section 3: Composition Information

<u>Components</u>	<u>CAS No.:</u>	<u>% By Wt.:</u>	<u>OSHA PEL:</u>	<u>ACGIH TLV:</u>
Active Ingredients:				
n-Decanol	112-30-1	38.3%	N/Av	50 ppm
Potassium Salt of Maleic Hydrazide	28382-15-2	11.1%	N/Av	5 mg/m ³
Inert Ingredients:	N/A	50.6%	N/A	N/A

Product contains a nominal concentration of 11.1% w/w of active as its potassium salt which is equivalent to 8.3% w/w of active Maleic Hydrazide (CAS 123-33-1).

Section 4: First-Aid Measures

Have product container or label with you when calling a poison control center or doctor or going for treatment.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Rinse mouth with water then have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Section 5: Fire Fighting Measures

Fire Hazards: Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure. Thermal decomposition during a fire can produce fumes and irritating gases.

Flammability classification (OSHA 29 CFR 1910.1200): Non-combustible

Flash point: >200°F

Lower flammable limit (% by volume): N/Av

Upper flammable limit (% by volume): N/Av

Fire Fighting Procedures: Keep people away. Isolate fire and deny unnecessary entry. Evacuate the area and fight the fire from upwind at a safe distance to avoid hazardous vapors or decomposition products. Dike and collect fire-extinguishing water to prevent environmental damage and excessive waste runoff.

Firefighting media: use foam, dry chemical, carbon dioxide, or water fog when fighting fires involving this product. Do not use water jet, as this may spread burning material. Minimize the use of water to avoid environmental contamination. Contain all runoff.

Special Protective Equipment for Firefighters: Wear positive-pressure self-contained breathing apparatus (SCBA) and protective firefighting clothing (includes firefighting helmet, coat, trousers, boots, and gloves). Use full face shield and operate in positive pressure mode. Avoid contact with this material during firefighting operations. If contact is likely, change to full chemical resistant firefighting clothing with self-contained breathing apparatus. If this is not available, wear full chemical resistant clothing with self-contained breathing apparatus and fight fire from a remote location. For protective equipment in post-fire or non-fire clean-up situations, refer to the relevant sections.

Hazardous Combustion Products: Carbon oxides, nitrogen oxides, irritating fumes and smoke.

NFPA: Health: Flammability: Reactivity:
2 1 0

(Rating: 4-Extreme, 3-High, 2-Moderate, 1-Slight, 0-Insignificant)

Section 6: Accidental Release Measures

Steps to be taken if Material is Released or Spilled:

- Contain spilled material if possible. Small spills: Apply appropriate absorbent and sweep up. Collect in suitable and properly labeled containers. Large spills: Contact Drexel Chemical Co. for clean-up assistance. See Section 13, Disposal Considerations, for additional information.

Personal Precautions:

- Isolate area. Keep unnecessary and unprotected personnel from entering the area. Refer to Section 7, Handling, for additional precautionary measures. Spilled material may cause a slipping hazard. Ventilate area of leak or spill. Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection.

Environmental Precautions: Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information.

Section 7: Handling and Storage

KEEP OUT OF REACH OF CHILDREN

Handling:

General Handling: Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling. Do not swallow. Avoid breathing vapor. Use with adequate ventilation. Wear coveralls over short-sleeved shirt and short pants, chemical resistant footwear plus socks when handling. Keep away from heat, sparks and flame. See Section 8, Exposure Controls and Personal Protection.

Storage:

Store in a cool, dry, ventilated and secure area designated specifically for pesticides and away from heat sources. Keep in original containers and keep containers closed when not in use. Do not store in excessive heat. Do not store near children, food, foodstuffs, drugs or potable water supplies.

Section 8: Exposure Controls / Personal Protection

Exposure Limits: TLV : n-Decanol 50 ppm; KMH 5 mg/m³

Personal Protection:

Eye/Face Protection: Wear safety glasses with side shields or chemical splash goggles to prevent vapors or mists from entering the eyes. If using a full face shield, always use safety glasses or goggles along with the face shield to ensure adequate protection of the eyes.

Skin Protection: Use protective clothing chemically resistant to this material. Selection of specific items such as face shield, boots, apron, or full body suit will depend on the task. Safety shower should be located in immediate work area. Remove contaminated clothing immediately, wash skin area with soap and water, and launder clothing before reuse or dispose of properly. Items which cannot be decontaminated, such as shoes, belts and watchbands, should be removed and disposed of properly.

Hand protection: Use gloves chemically resistant to this material. Examples of preferred glove barrier materials include: Neoprene, Nitrile/butadiene rubber ("nitrile" or "NBR") or Polyvinyl chloride ("PVC" or "vinyl").

Respiratory Protection: Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. When handling in enclosed areas, when large quantities of mists are generated or prolonged exposure is possible in excess of the TLV, use a respirator with either an organic vapor-removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C) or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G).

Ingestion: Avoid ingestion of even very small amounts; do not consume or store food or tobacco in the work area; wash hands and face before smoking or eating.

Engineering Controls:

Ventilation: When handling this product proper ventilation is required to maintain exposure below the TLV. Ventilate all transport vehicles prior to unloading. Facilities storing or utilizing this material should be equipped with an eyewash facility and safety shower.

Section 9: Physical and Chemical Properties

Physical State:	Liquid
Color:	Cream
Odor:	Sweet
Flash Point:	> 200°F
Vapor Pressure (mmHg):	Negligible
Boiling Point:	>212°F
Vapor Density (air = 1) :	>5
Bulk Density (H₂O = 1):	0.99 g/cc
Freezing Point:	N/Av
Solubility in water:	Emulsifies
pH:	7 – 8 (@ 5% dilution)
Viscosity:	N/Av

Section 10: Stability and Reactivity

Stability/Instability: Thermally stable at typical use temperatures and in closed containers.

Conditions to Avoid: Avoid heat of open flame. Avoid high temperatures above 130°F (54.4°C).

Incompatible Materials: Avoid contact with: Strong acids. Strong bases. Strong oxidizers.

Hazardous Polymerization: Will not occur

Thermal Decomposition: Decomposition products can include and are not limited to: Carbon oxides, nitrogen oxides.

Section 11: Toxicological Information

Acute Toxicity:

Ingestion:

- LD50, (rat): >3,000 mg/kg

Dermal:

- LD50, (rat): >4,000 mg/kg

Inhalation:

- LC50, (4h), (rat): >6.55 mg/l

Eye Irritation (rabbit):

- Minimally irritating

Skin Irritation (rabbit):

- Non irritating

Sensitization Skin (guinea Pig):

- Non-sensitizer

Chronic Toxicity and Carcinogenicity:

- No component is listed by IARC, NTP, ACGIH or OSHA.

Teratogenicity, mutagenicity, and other reproductive effects: None known

Section 12: Ecological Information

Ecotoxicological data: Information based on Maleic Hydrazide:

ENVIRONMENTAL FATE:

- Practically non-toxic to fish, aquatic organisms and bees.

Persistence and Degradability:

- Mobile especially in sandy soils, not persistent in the environment

Aquatic Toxicity:

- Rainbow Trout: 96 hour LC50: (>1000 mg/L) (KMH)
- Bluegill: 96 hour LC50: (1608 mg/L) (KMH)
- Daphnia magna: 48 hour LC50: (>1000 mg/L) (KMH)

Bees:

- Bee: Acute oral LD50: (>100mg/bee)

Bird Toxicity:

- Mallard Duck: LD50: (>4640 mg/kg)

Ecotoxicological data: Information based on n-Decanol:

ENVIRONMENTAL FATE:

- Moderately toxic to aquatic organisms, bees and birds

Persistence and Degradability:

- Will not bioaccumulate in soils or water. Fatty alcohols are abundant in nature

Aquatic Toxicity:

- Rainbow Trout: 96 hour LC50: (4.2 – 5.6 ppm)
- Bluegill: 96 hour LC50: (5.05 ppm)
- Daphnia magna: 48 hour EC50: (6.51 ppm)

Bees:

- Bee: 48h LD50: (13.8 µg/bee)

Bird Toxicity:

- Mallard Duck: Acute LD50: >4640 mg/kg

Section 13: Disposal Considerations

If wastes and/or containers cannot be disposed of according to the product label directions, disposal of this material must be in accordance with your local or area regulatory authorities. This information presented below only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. If the material as supplied becomes a waste, follow all applicable regional, national and local laws.

Section 14: Transport Information

DOT: Non-regulated.

IMDG: Not regulated.

IATA: Not regulated:

Freight description: Agricultural plant growth regulator

E.R.G: 171

This information is not intended to convey all specific regulatory or operational requirements/information relating to this product. Additional transportation system information can be obtained through an authorized sales or customer service representative. It is the responsibility of the transporting organization to follow all applicable laws, regulations and rules relating to the transportation of the material.

Section 15: Regulatory Information

OSHA Hazard Communication Standard:

- This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

EPA FIFRA INFORMATION:

* This chemical is a pesticide product registered by the United States Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets (SDS), and for workplace labels of non-pesticide chemical. The hazard information required on the pesticide label is listed out below. The pesticide label also includes other important information, including directions for use.

- EPA Label Human Hazard Statements: CAUTION: Harmful if swallowed. Causes moderate eye irritation. Harmful if absorbed through skin. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling.
- EPA/CERCLA Reportable Quantity: 5,000 Lbs. (maleic hydrazide)

SARA/TITLE III:

- Sec. 302. Extremely Hazardous Substance Notification: This material is not known to contain any Extremely Hazardous Substances.
- Sec. 311/312. Hazard Categories: Immediate health hazard
Fire Hazard
- Sec. 313. Toxic Chemical(s): This material is not known to contain any Toxic Chemical constituents.
- RCRA Waste Code: U148 (maleic hydrazide)S

California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986):

- No component of this product is listed.

Toxic Substances Control Act (TSCA):

- All components of this product are on the TSCA Inventory or are exempt from TSCA Inventory requirements under 40 CFR 720.30

Section 16: Other Information

Drexel Chemical Company recommends that each customer or recipient of this SDS to study it carefully and consult appropriate expertise, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. The information herein is provided in good faith and believed to be accurate as of the effective date shown below. However, no warranty, express or implied, is given. Regulatory requirements are subject to change and may differ between various locations. It is the buyer's/user's responsibility to ensure that his activities comply with all federal, state, provincial or local laws. The information presented here pertains only to the product as shipped. Since conditions for use of the product are not under the control of the manufacturer, it is the buyer's/user's duty to determine the conditions necessary for the safe use of this product. Due to the proliferation of sources for information such as manufacturer-specific SDSs, we are not and cannot be responsible for SDSs obtained from any source other than ourselves. If you have obtained an SDS from another source or if you are not sure that the SDS you have is current, please contact us for the most current version.

Date Revised: May 15, 2018

Supersedes: March 30, 2016
