

ChelStar Liquid 6.5%

Zinc Chelate • EDTA

Zn

Fully Chelated Micronutrient for Plant Nutrition

15258 032317

ChelStar Liquid 6.5% Zinc Chelate EDTA 6-0-0

GUARANTEED ANALYSIS

Total Nitrogen (N).....	6.0%
3.3% Ammoniacal nitrogen	
2.7% Other water-soluble nitrogen	
Zinc (Zn).....	6.5%
6.5% Chelated zinc	

Derived from zinc diammonium ethylenediaminetetraacetate

CAUTION: KEEP OUT OF REACH OF CHILDREN

Precautionary Statements: Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling.

GENERAL INFORMATION: *ChelStar Liquid 6.5% Zinc Chelate EDTA* is a fully chelated liquid form of zinc EDTA useful for prevention and correction of zinc deficiency in crops. Soil application is the preferred application method to prevent zinc deficiency. Foliar application, however, will provide correction when a soil application is impractical. This product may be mixed and applied to soil with slightly acidic to moderately alkaline liquid NPK fertilizers with a pH range of 3 to 11.

SOIL APPLICATION DIRECTIONS: Apply *ChelStar Liquid 6.5% Zinc Chelate EDTA* to acid and mildly alkaline soils. This product is a concentrated solution that can be added to water or mixed with liquid fertilizers for optimum delivery and coverage. For trees or individual plants, this product may be applied directly on the soil uniformly under the plant's drip line then watered in. Soil applications may also be made by adding to water then mixing or metering into drip, sprinkler, or furrow irrigation systems.

FOLIAR APPLICATION DIRECTIONS: *ChelStar Liquid 6.5% Zinc Chelate EDTA* may be applied in water or in combination with most pesticides. Buffer the spray solution to a pH of 6 to 6.5 for best performance. Thorough coverage and the use of wetting agents often enhance nutrient uptake from foliar sprays. Application rates and dilution factors depend on crop sensitivity, the amount of foliage to be sprayed, and the

application method. Avoid applying this product when plants are suffering from moisture stress. If there is any doubt, apply the spray solution to a small test area of the crop or foliage to assess any undesirable effects or phytotoxicity before general application.

AERIAL APPLICATION DIRECTIONS: Apply 0.5 to 1 pt. of *ChelStar Liquid 6.5% Zinc Chelate EDTA* per acre in at least 10 gal. of water. For application timing and frequency, refer to appropriate foliar recommendations below.

CROP RECOMMENDATIONS – SOIL APPLICATION

VEGETABLE CROPS (including beans, celery, cucumbers, lettuce, melons, onions, peas, peppers, potatoes, sweet corn, tomatoes) and **FIELD CROPS** (including alfalfa, corn, dry beans, forage grasses, peas, rice, safflower, sorghum, sugar beets, sugarcane): Apply *ChelStar Liquid 6.5% Zinc Chelate EDTA* at 2 to 10 qts. per acre.

FRUIT, NUT & VINE CROPS (including almond, apple, apricot, avocado, berry, cherry, citrus, grape, mango, olive, pear, peach, pistachio, plum, walnut): Apply *ChelStar Liquid 6.5% Zinc Chelate EDTA* at 2 to 12 qts. per acre or 2 to 10 Tbsp. per inch of tree diameter.

ORNAMENTAL SHRUBS & TREES (including azaleas, gardenias, junipers, pines, roses): Apply *ChelStar Liquid 6.5% Zinc Chelate EDTA* at 2 Tbsp. for small shrubs and up to 2 Tbsp. per inch of tree diameter for large trees and shrubs.

TURF: Apply 1.5 pts. per 1,000 sq. ft. or 8 gal. per acre.

Note: the rates provided above are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result.

CROP RECOMMENDATIONS – FOLIAR APPLICATION

TREES (CITRUS): Apply *ChelStar Liquid 6.5% Zinc Chelate EDTA* at 1 to 2 pts. per 100 gal. of cover spray any time except during bloom.

FRUIT, TREE & VINE CROPS (excluding citrus): Apply *ChelStar Liquid 6.5% Zinc Chelate EDTA* at 1 to 2 pts. per acre in sufficient spray volume for thorough coverage (25 gal. minimum) at dormant/delayed dormant before bloom, then after full bloom at 2 to 3 week intervals as needed. NOTE: For smooth-skinned fruit (peach, pear, apple, etc.) apply 1 pt. per acre in 50 to 100 gal. of water.

VEGETABLE & FIELD CROPS (ground equipment only): Apply *ChelStar Liquid 6.5% Zinc Chelate EDTA* at 1 to 2 pts. per acre in sufficient spray volume for thorough coverage (20 gal. minimum).

AERIAL: Apply at .5 to 1 pt. per acre with sufficient spray volume for thorough coverage (10 gal. minimum).

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.htm>

Storage and Disposal: Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.

CONDITIONS OF SALE AND WARRANTY

Chemurgic Agricultural Chemicals, Inc. warrants that this product conforms to the chemical description on the label and is reasonably suited for the purposes stated when used as recommended under normal conditions.

Unintended consequences such as crop damage or poor performance may result from factors including, but not limited to, method of application, timing, crop and soil condition, weather, and other materials present, all of which are beyond the control of *Chemurgic Agricultural Chemicals, Inc.* and Seller.

Chemurgic Agricultural Chemicals, Inc. neither makes, nor authorizes any agent or representative to make any other warranties, expressed or implied, including fitness or merchantability.

Buyer and user acknowledge and assume all risks and liability resulting from the handling, storage and use of this material.

In no case shall *Chemurgic Agricultural Chemicals, Inc.* or the Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product.

The foregoing is a condition of sale by *Chemurgic Agricultural Chemicals, Inc.* and is accepted as such by the Buyer.
