ChelStar

9% Calcium Chelate

Fully Chelated Micronutrient for Plant Nutrition

ChelStar 9% Calcium Chelate 6-0-0

GUARANTEED ANALYSIS

Total Nitrogen (N).....6.0%
 6.0% Water-Soluble Nitrogen

Calcium (Ca).....9.0%
 9.0% Chelated Calcium

Derived from calcium salt of ethylenediaminetetraacetate (CaEDTA).

Precautionary Statements: This product is not classified as a hazardous substance based on currently available data. However, observe good industrial hygiene practices. Wash hands after handling.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority regulations.

GENERAL INFORMATION:

ChelStar 9% Calcium Chelate is a fully chelated, water-soluble, powdered form of calcium EDTA useful for prevention and correction of calcium deficiency in crops. Soil application is the preferred application method to prevent calcium deficiency. Foliar application, however, will provide correction when a soil application is impractical.

SOIL APPLICATION DIRECTIONS:

ChelStar 9% Calcium Chelate may be used on all types of soils. It should be dissolved in water or fluid fertilizer, or dry blended with water-soluble fertilizers for optimum delivery and coverage. For trees or individual plants, *ChelStar 9% Calcium Chelate* may be blended with an inert (such as soil or sand) or sprinkled directly on the soil uniformly under the plant's drip line then watered in. Soil applications may also be made by dissolving in water and then mixing or metering into drip, sprinkler or furrow irrigation systems.

FOLIAR APPLICATION DIRECTIONS:

ChelStar 9% Calcium Chelate may be applied in water or in combination with most pesticides. Buffer the spray solution to a pH of 6 to 6.5 for best performance. Thorough coverage and the use of wetting agents often enhance nutrient uptake from foliar sprays. Application rates and dilution factors depend on crop sensitivity, the amount of foliage to be sprayed, and the application method. Avoid applying *ChelStar 9% Calcium Chelate* when plants are suffering from moisture stress. If there is any doubt, apply the spray solution to a small test area of the crop or foliage to assess any undesirable effects or phytotoxicity before general application.

AERIAL APPLICATION DIRECTIONS: Apply 0.33 lb. of *ChelStar 9% Calcium Chelate* per acre in at least 10 gal. of water. For application timing and frequency, refer to appropriate foliar application recommendation below.

CROP RECOMMENDATIONS – SOIL APPLICATION

VEGETABLE CROPS (including beans, peas, potatoes, sweet corn, tomatoes) and **FIELD CROPS** (including corn, dry beans, sorghum, sugar beets, sugarcane): Apply *ChelStar 9% Calcium Chelate* at 2 to 8 lbs. per acre.

TREE & VINE CROPS (including almond, apple, apricot, avocado, berry, cherry, citrus, grape, olive, pear, peach, pistachio, plum, walnut): Apply *ChelStar 9% Calcium Chelate* at 2 to 10 lbs. per acre or 0.5 to 2 oz. per inch of tree diameter.

ORNAMENTAL SHRUBS & TREES (including azaleas, gardenias, junipers, pines, roses): Apply *ChelStar 9% Calcium Chelate* at 2 Tbsp. for small shrubs and up to 2 Tbsp. per inch of tree diameter for large trees and shrubs.

TURF: Apply *ChelStar 9% Calcium Chelate* at 1 lb. per 1,000 sq. ft. or 43 lbs. per acre.

Note: the rates provided above are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result.

CROP RECOMMENDATIONS – FOLIAR APPLICATION

TREES (CITRUS): Apply *ChelStar 9% Calcium Chelate* at 1 to 2 lbs. per 100 gal. of cover spray any time except during bloom or when fruit is on the tree.

TREES & VINE CROPS (excluding citrus): Apply *ChelStar 9% Calcium Chelate* at 1 to 2 lbs. per acre in sufficient spray volume for thorough coverage (25 gal. minimum) at dormant/delayed dormant before bloom, then after full bloom at 2 to 3 week intervals as needed. **NOTE:** For smooth-skinned fruit (peach, pear, apple, etc.) apply 1 lb. per acre in 50 to 100 gal. of water.

VEGETABLE & FIELD CROPS (ground equipment only): Apply *ChelStar 9% Calcium Chelate* at 0.33 to 1.33 lbs. per acre in sufficient spray volume for thorough coverage (25 gal. minimum).

TURF: Apply *ChelStar 9% Calcium Chelate* at 3.5 oz. per 1,000 sq. ft. for general turf. Apply at 1 to 5 oz per 1,000 sq. ft. for golf greens. Always apply in sufficient spray volume for thorough coverage.
