MIX RATE

The mix rate for Pollen Boost is 7.6 mL (1 ½ Tsp.) per 1 Gallon of water that should only be applied directly to the plant's leaf.

Best land management practices should be used at all times with any fertilizer; this material should be prevented from entering public or private water supplies (including wells) and any lake, stream, or river.

For the Pollen Boost application rates suitable for your geographical area or the maximum allowable nutrient application rates per acre, consult a trained soil specialist or write to Vegalab LLC, 1201 North Orange Street, Suite 7233, Wilmington, DE 19801-1186.

CAUTION: This fertilizer is to be used only on soil which responds to Boron (B). Crops high in Boron (B) are toxic to grazing animals (ruminants).
