

FIFRA 24(c) Special Local Need Label (SLN)

For distribution and use only in the state of Idaho

For use on Alfalfa Grown for Seed for control of Plant bugs (*Lygus* sp.),
Alfalfa Weevil and Spotted Alfalfa Aphid

CORMORAN™

For Agricultural or Commercial Use Only
EPA Reg. No. 66222-264 **SLN No. ID-170002**

This label expires and must not be distributed or used in accordance with this SLN registration after December 31, 2020

ACTIVE INGREDIENTS:	% BY WT.
Novaluron	9.1%
Acetamiprid	7.3%
OTHER INGREDIENTS:	83.6%
TOTAL:	100.0%

KEEP OUT OF REACH OF CHILDREN

CAUTION/PRECAUTION

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This state-specific Section 24(c) labeling and federal label for this product must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, and precautions on the EPA registered label for EPA Reg. No. 66222-264.
- Do not apply this product through any type of irrigation system.

CROP	Insect	RATE OF APPLICATION
Alfalfa Grown for Seed	Plant Bugs (<i>Lygus</i> sp.) Aphids (including Blue Alfalfa Aphid, Cowpea Aphid, Pea Aphid, Spotted Alfalfa Aphid) Alfalfa Weevil (suppression)	9.0 – 12.0 fl oz per acre

APPLICATION RATE:

Make application at the rate of 9.0 – 12.0 fl oz per acre. Make applications only in accordance with directions and conditions of use described in the EPA registered Cormoran™ label.

METHOD OF APPLICATION:

Cormoran™ may be applied in a minimum of 15 gallons of spray solution per acre by ground sprayer or in a minimum of 5 gallons of spray solution per acre by aircraft spray equipment. Check equipment calibration frequently. Complete coverage and uniform application are essential for the most effective results, especially when lower spray volumes are applied. If necessary, increase the spray volume per acre for complete crop coverage.

TIMING/FREQUENCY OF APPLICATION:

Repeat applications if needed to maintain control, but do not make applications less than 7 days apart.

SPECIFIC USE RESTRICTIONS:

- Restricted Entry Interval is 12 hours.
- Preharvest interval of 14 days
- Do not apply more than 0.23 lb Novaluron active ingredient containing products per acre per season.
- Do not apply more than 0.3 lb Acetamiprid active ingredient containing products per acre per season.
- Do not apply more than 36.0 fl oz of formulated product per acre per season.

Note: No portion of this alfalfa seed crop may be used or distributed for human food or animal feed purposes.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to birds and aquatic invertebrates. This product is toxic to bees exposed to direct treatment. Do not apply this product while bees are actively visiting the treatment area. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas.

Do not contaminate water when disposing of equipment washwater or rinsate. Do not contaminate water used for irrigation or domestic purposes. This product may contaminate water through drift of spray in wind. This product has a potential for runoff for several days to weeks after application. Poorly draining soil with shallow water tables is more prone to produce runoff. A level, well maintained vegetative (grass) buffer strip between areas to which this product is applied and the surface water features such as ponds, streams, and springs will reduce the potential for contamination of water from rainfall runoff. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours. Sound erosion control practices will reduce this product's contribution to surface water contamination. In order minimize the possibility of developmental effects on pollinator larvae, including honey bee brood, do not use CORMORAN™ on blooming crops.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves, such as barrier laminate or butyl rubber > 14 mils or neoprene rubber > 14 mils or polyvinyl chloride > 14 mils or Viton > 14 mils
- Shoes plus socks
- Protective eyewear
