

CHELATOR LC

Liquid Trace Mineral Complexor

DESCRIPTION

CHELATOR LC is a natural organic chelator-surfactant complex that potentiates a wide variety of agricultural and industrial processes. **CHELATOR LC** reduces surface tension, reduces reactivity of components in complex mixtures, chelates trace minerals, and improves adhesion to leaf and plant surfaces. **CHELATOR LC** is synergistic with microbial processes that result in degeneration of recalcitrant hydrocarbons and pesticides in soil/water systems.

COMPATIBILITY

CHELATOR LC is compatible with most fertilizers, fungicides and pesticides. In all cases, it is recommended that a jar test be made to determine the compatibility of **CHELATOR LC** with other materials before proceeding with high volume mixing.

APPLICATION

TO CHELATE TRACE MINERALS IN DILUTED SOLUTIONS: Add 1 to 5 quarts of **CHELATOR LC** per 100 gal. of mineral solution. Dilute in water or product mixture in which to be applied. AS A SPREADER/STICKER: Apply with foliar nutrients at a rate of 1/2 to 1 pint per acre. Higher rates may cause leaf burn.

STORAGE

Store in a cool, dry place. Avoid prolonged exposure to direct sunlight. Tightly reseal after opening to preserve shelf life.

CAUTION

Product is safe and nontoxic when used as directed. Keep out of reach of children and pets! Do not inhale or ingest. Avoid contact with skin, eyes, or clothing. In case of contact, flush with water. If swallowed, drink water and consult a physician.

NOTICE - Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop and soil conditions may vary, NRG and/or seller make no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use and handling, whether or not in accordance with directions or suggestions.

GUARANTEED ANALYSIS

NON-PLANT FOOD INGREDIENTS:

Modified Hardwood Lignosulfonates, Citrus Terpenes and Tween-80.
