

KelpXpress™

This product contains: Sea Plant Extracts from *Ascophyllum nodosum* (Kelp)

2-4-3

GUARANTEED ANALYSIS

TOTAL NITROGEN (N).....	2%
0.9% Nitrate Nitrogen	
0.2% Ammoniacal Nitrogen	
0.9% Urea Nitrogen	
AVAILABLE PHOSPHATE (P ₂ O ₅).....	4%
SOLUBLE POTASH (K ₂ O).....	3%
Iron (Fe)	0.134%
0.134% Chelated Iron (Fe)	

Derived From: Sea plant extract from *Ascophyllum nodosum* (Kelp), Protein Hydrolysate, Ammonium Phosphate, Potassium Phosphate, Urea, and Iron EDTA.

Chelating agent is EDTA (ethylenediaminetetraacetic acid).

DIRECTIONS FOR USE

Fertigation: Can be used under normal practices of fertigation.

Perennial Crops: Apply at 1.5 to 3 pints per acre beginning at initial root flush periods. Subsequent applications should be made at monthly intervals with a maximum of 8 pints per season.

Annual Crops: Apply at 1 to 2 pints per acre approximately 14 days after crop emergence and continue at 10 to 14 day intervals through flowering, fruit set and sizing periods.

Rate of Application: (foliar applications): May be used at a rate of ½ pint to 1 pint per acre to supplement the fertigation program. Applications should be made prior to and during bloom periods.

Compatibility: KelpXpress is compatible with many fertilizers that might be injected through fertigation equipment, however it is impossible to evaluate every potential combination. Always run a jar compatibility test before mixing with liquid fertilizers. This product is compatible with most pesticides commonly used on vegetable, fruit and agronomic crops. **CAUTION:** Do not use with Dormant Oil, Lime Sulfur, Spray Lime, or highly alkaline spray materials. Add product to the spray tank or pre-mix tank when it is about half full. Agitation in the tank is preferred to increase the speed of solubility. Where extremely cold water is used, allow a few extra minutes for the product to completely dissolve before spraying.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

Use this product in accordance with good agronomic practices, which include utilizing proven spray equipment set for proper coverage. Do not make applications when temperatures are too hot, as crop damage may occur. Applications should be made at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.

Notice of Warranty: Miller warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Miller. In no case shall Miller be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the buyer. MILLER MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.
