CHAMELEON

CHAMELEON is a multi-purpose adjuvant that has nonionic surfactants that make it compatible with most of today's chemicals. **CHAMELEON's** surfactant action helps to keep the solution in suspension, reduces surface tension, giving spray an even coverage. **CHAMELEON** cuts leaf wax and increases the penetration of spray. **CHAMELEON** helps place spray on target, creates uniform droplets for more efficient coverage. This results in greater deposition for efficient control. **CHAMELEON** reduces foam, controls drift of spray solutions, helps stick spray solutions to the target and reduces evaporation loss.

GENERAL INFORMATION

CHAMELEON is a self-emulsifiable spreader sticker, surfactant adjuvant designed to improve the efficiency of herbicide, insecticide, and fungicide sprays by increasing contact activity, penetration, and adhesion to plant surfaces. It is formulated nonionic surfactant which has shown excellent synergistic effect with different pesticidal spray solutions.

The unique ingredients in **CHAMELEON** provide a combination effect of wetting, sticking, spreading, and penetration which vastly improve the effectiveness of fungicides, insecticides, herbicides, or defoliants.

As a general rule, adjuvants are applied to the tank mix; however, since **CHAMELEON** is self-emulsifiable it can also be incorporated in herbicide or insecticide emulsifiable concentrates for use in low-volume formulations.

**COMPATIBLE
MULTI-PURPOSE
REDUCES FOAM**

MANUFACTURED BY

 **Jay-Mar, Inc.**

P.O. Box 429 • Plover, WI 54467-0429

Nonionic spreader/sticker surfactant/adjuvant for increased effectiveness of insecticide, fungicide and weed killer

Principal Functioning Agents:

Alkyl polyoxyethylene ethers, polymerized resins and fatty acids	17.6%
Reacted amines	5.2%
Formulation Aid	
Aromatic petroleum solvent	4.9%
Inert solvents	72.3%
TOTAL	100.0%

STOP — READ LABEL BEFORE USING

Do Not Store Below 32° F

KEEP OUT OF REACH OF CHILDREN WARNING

Causes eye irritation. Avoid contact with eyes, in case of contact, flush eyes with water for at least 15 minutes and get medical attention.

Harmful if swallowed. If swallowed, do not induce vomiting. Avoid contact with skin. Avoid breathing spray mist. Wash hands after using. Do not store near feed or food products.

MIXING INSTRUCTIONS

Add **CHAMELEON** to the spray tank with good agitation, after all other spray materials have been added.

DIRECTIONS FOR USE

Dosage Per 100 Gallons Spray Mix

Defoliants and Desiccants	1-3 pints
Fungicides and Acaricides	4-8 ounces
Herbicides	1-3 pints
Insecticides	4-8 ounces
Wettable Powders	8-12 ounces

In Concentrate Sprays: Use 4 to 8 fluid ounces per acre on field crops such as cotton, forage, grain, and row crops.

These directions for use do not constitute a recommendation to use any toxicant in any manner contrary to the directions of the manufacturer.

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use but neither this warranty nor any other warranty or merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to Seller and Buyer assumes the risk of any such use.

- Controls drift of spray solutions
- Helps stick spray solutions to the target
- Reduces evaporation loss

NET CONTENTS: 2 1/2 GALLONS (9.5 LITERS)
