

CORE Magnesium Nitrate

Readily Available Source of Magnesium for Soil and Foliar Applications

General Information

CORE Magnesium Nitrate solution is an effective, readily available source of liquid Magnesium for both soil and foliar applications. It may be applied in water sprays, with pesticides, or with most liquid fertilizers.

Recommended Rates

TREE, VINE, AND FRUIT CROPS

Nuts and Pome Fruit: Apply 1 to 4 quarts per acre per application. Apply first application at green tip and subsequent applications at 30-day intervals, or as needed to meet nutritional requirements.

Grapes and Berries: Apply 1 to 4 quarts per acre per application. Apply first application pre-bloom and subsequent applications at 30-day intervals, or as needed to meet nutritional requirements.

Avocados and Citrus Fruit: Apply 1 to 4 quarts per acre per application. Apply first application at pre-bloom, then subsequent applications at mid crop and 3 to 4 weeks prior to harvest, or as needed to meet nutritional requirements.

Stone Fruit: Apply 1 to 4 quarts per acre per application. Apply first application at green tip or pink bud. Apply subsequent applications at fruit set or jacket fall, fruit thinning and 2 to 3 weeks prior to harvest, or as needed to meet nutritional requirements.

FIELD AND VEGETABLE CROPS

Apply 2 to 4 quarts per acre broadcast prior to planting. Apply 1 to 4 quarts foliar in sufficient spray volume to ensure uniform coverage during early growth to bloom stage, then one to two subsequent applications at 2-week intervals or as needed to supplement nutritional requirements.

Use in accordance with recommendations of a qualified individual or institution such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.
