

BIOSYNERGIZER™

8-10-5

Starter Fertilizer

GENERAL INFORMATION

BIOSYNERGIZER 8-10-5 is a liquid plant food designed for soil applications. **BIOSYNERGIZER 8-10-5** is compatible with most fertilizer solutions and pesticides. Dilute **BIOSYNERGIZER 8-10-5** with water before mixing with other fertilizers or pesticides.

DIRECTIONS OF USE:

Shake well before using.

Dilute **BIOSYNERGIZER 8-10-5** with water and apply to plants according to the following recommendations:

Preplant - 1-2 quarts per acre directly under seed no more than 7 days prior to planting.

Dip - 2 fluid ounces per gallon of water and soak roots for 1-2 minutes prior to planting.

Almonds, Apricots, Cherries, Hops, Plums, Peaches - 3-4 quarts per acre after bud swell to popcorn stage, prior to bloom. Older trees and vines may require another application 4-6 weeks later.

Beans, Peas - 2-3 quarts per acre at bud stage, prior to bloom. Repeat the application 2 more times in 2 week intervals.

Citrus - 4-6 quarts per acre at bud stage, prior to bloom. When new growth appears, repeat the application 2 times at 2-4 week intervals.

Cotton - 1-2 quarts per acre after true leaves appear. Second application should be made at early square at 2-3 quarts per acre. Repeat the application 2 more times at 2 week intervals.
