GENERAL INFORMATION

CNI Boron Plus is a 100% water-soluble formulation of potassium nitrate and boric acid for use in foliar applications used to help prevent or correct boron and potassium deficiencies in row crops.

WARNING

DO NOT EXCEED RECOMMENDED RATES. THIS MATERIAL CONTAINS BORON. CROPS SENSITIVE TO BORON MAY BE INJURED.

DIRECTIONS FOR USE

Foliar Application:

- **In general**, apply 5 pounds per acre on cotton, peanuts or soybeans per season. Make 2 applications of 2.5 pounds per acre and use at least 5 to 10 gallons of water per application.

- **Cotton**: To stimulate boll development and fiber strength use 2.5 lbs per acre applied at early bloom stage and another 2.5 lb application 10-14 days later.

- **Peanuts**: To prevent "hollowheart" and increase fruiting and carbohydrate metabolism use 2.5 lbs per acre applied in the 2nd fungicide application. Repeat application 10-14 days later.

- **Soybeans**: For increased seed formation and nitrogen fixation, make first 2.5 lb application within 6 weeks after planting and another 2.5 lb application 14 days later.
