STORAGE AND DISPOSAL

Storage: Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open containers. After partial use, replace lids and close tightly. Do not put concentrate or dilute material in food or drink containers. Do not contaminate pesticides, fertilizers, water, food, or feed by storage or disposal. Keep water out of this product in storage or oil may not emulsify properly. In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Confine spills. Call Collect: CHEMTREC (800) 424-9300. To confine spill: If liquid, dike surrounding area or absorb with sand, cat litter or commercial clay. If dry material, cover to prevent dispersal. Place damaged package in holding container. Identify contents.
Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
Container Disposal: Metal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in sanitary landfill, or by other procedures approved by state and local authorities. Do not cut or weld metal containers. **Plastic:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters. Not for aquatic use.

Personal Protection Equipment:

Applicators and other handlers must wear: long-sleeved shirt and long pants, shoes plus socks, rubber or chemical impervious gloves, and protective eyewear. Respiratory protection not normally required but if vapors exceed acceptable level, wear MSHA/NIOSH approved respirator to protect against vapors.

GENERAL INFORMATION

This product is a highly refined emulsifiable petroleum oil to be used as a carrier (diluent) or adjuvant and mixed with oil soluble herbicides for woody plant control in forest and other non-crop sites where diesel oil, fuel oil, kerosene and similar oil carriers or additives are recommended. When used as a carrier or adjuvant, this product will aid in the spreading and penetration of herbicides into bark and stems of woody plants.

DIRECTIONS FOR USE

For Basal Bark Applications: This product can be mixed with oil soluble or miscible herbicides and, when allowed by the herbicide label, be used as the sole diluent or carrier to improve spreading and penetration into bark. Thinline, streamline, high and low volume basal bark applications can be made with this product and labeled herbicide mixtures. Suggested mixing rates when used as the sole carrier vary from 1% herbicide in 99% of this product to 75% herbicide in 25% of this product depending on herbicide and method of application. For specific dilution rates consult the herbicide label for the product being used. Typical applications direct these mixtures onto the lower 18 inches of individual brush and tree stems.

For directed or broadcast stem and foliage spraying: When allowed by the herbicide label, this product can be used as the sole carrier for herbicides or used with herbicide/water mixtures to improve spreading and penetration into the plant. For herbicide and water mixtures use up to 40% of this product by volume in these mixtures. Consult the herbicide label being used for proper mixing sequences. Since an emulsion is formed, maintain agitation to prevent separation. When used as the sole carrier with oil soluble herbicides add the required amount of herbicide to this product in the spray tank. A true solution is formed, but agitation is recommended. Consult the herbicide label of the product being used for use rate and volume per acre recommendations. If the compatibility of mix components is unknown, conduct a jar test before mixing large quantities. Use coarse sprays or special equipment designed to minimize spray drift.

Note: This product may increase the potential for plant injury if used over desirable plants. When in doubt about plant safety conduct small tests first or consult with university extension foresters or similar experts before using over the top. Observe precautions on labels of other products regarding potentially phytotoxic interactions with oils.
