

CHB Standard Humic 10

General Information:

CHB Standard Humic 10 is a humic acids colloidal suspension extracted from oxidized lignite.

CHB Standard Humic 10 is primarily designed for soil and water run applications in combination with fertilizers. Concentrated humic acids suspension products are not always easily compatible with all liquid fertilizers. Consult your qualified Bio-Gro, Inc. representative for instructions for information on blending with specific fertilizer formulations.

Directions for Use:

It is recommended to shake, stir or agitate containers or tanks of CHB Standard Humic 10 just prior to usage.

Storage and Disposal:

Store in original containers at temperatures above freezing. Dispose of waste at approved disposal facility. To dispose of containers, triple rinse and dispose according to local and state regulations.

Suggested Applications

CHB Standard Humic 10 can be soil applied and water run on all crops at rates of 2 to 15 gallons per acre. CHB Standard Humic 10 can also be impregnated into dry fertilizer blends.

It is best to use materials in split applications with other fertilizer and micronutrient products at 1 to 3 gallons per acre in 2 to 6 applications.

CHB Standard Humic 10 can be applied by side dress and banding equipment, water run through irrigation systems or sprayed directly on soils with other fertilizer materials.

***NOTICE:** Since many pesticide products can be neutralized and/or tied up by soil organic matter, it is highly recommended not to use pesticides applied directly with humic acids. Consult pesticide representative before using on a large scale.*
