

Cal-Mate

0-0-1

Guaranteed Analysis:

Soluble Potash (K₂O).....1%
Derived from potassium hydroxide

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:
3.0% Humic Acid
Derived from Leonardite

Uses:

Cal-Mate is a humic acid solution extracted from leonardite in a proprietary formulation. Cal-Mate is formulated so that it can be mixed with all liquid fertilizers including acid fertilizers and liquid calcium products.

Application Methods:

Cal-Mate is primarily designed for soil and water run applications in combination with fertilizers. Cal-Mate can be applied by side dress and banding equipment, water run through irrigation systems or sprayed directly on soils with other fertilizer materials. Cal-Mate can also be impregnated into dry fertilizer blends.

Compatibility:

Cal-Mate is compatible with most fertilizers and bioproducts. Consult your Source to Source Representative for more information. Jar test for compatibility prior to mixing with other fertilizer blends.

CAUTION: KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed, inhaled or absorbed through skin. May cause eye and skin irritation. In case of contact, immediately flush eyes and/or wash skin with plenty of fresh water for at least 15 minutes. This product is not regulated by D.O.T.

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with direction under normal conditions of use. The buyer shall assume all risks of such use, including, but not limited to crop injury and ineffectiveness. In no case shall Source to Source be liable for consequential, special or indirect damages resulting from the use or handling of this product.

Information regarding the contents and levels of metals in this product is available on the internet at <http://agr.wa.gov>. Or call your Source to Source Representative at 866-727-4572. Always refer to the label on the product before using Source to Source products.

Application Rates and Timings:

Cal-Mate can be soil applied and water run on all crops at rates of 2 to 15 gallons per acre.

It is best to use materials in split applications with other fertilizer and micronutrient products at 1 to 3 gallons per acre in 2 to 6 applications.

When applications are sprayed or applied directly to soil without other nutrients, dilute in 3-10 gallons/acre of water prior to application.

Precautions:

Since many pesticide products can be neutralized and/or tied up by soil organic matter, it is highly recommended not to use pesticides applied directly with humic acids. Consult pesticide representative before using on a large scale.

It is recommended to shake, stir or agitate containers or tanks of Cal-Mate just prior to usage.

Storage and Disposal:

Store in original containers at temperatures above freezing. Dispose waste at approved disposal facility. To dispose of containers, triple rinse and dispose according to local and state regulations.

"Approved material under Washington State Department of Agriculture organic food program"
