

FERTIL HUMUS®

24-0-0

GUARANTEED ANALYSIS

Total Nitrogen (N)	24.00%	Manganese (Mn)	0.05%
5.75% Ammoniacal Nitrogen		0.05% Chelated Manganese (Mn)	
5.75% Nitrate Nitrogen		Zinc (Zn)	0.05%
12.50% Urea Nitrogen		0.05% Chelated Zinc (Zn)	
Iron (Fe)	0.10%		
0.10% Chelated Iron (Fe)			

Derived from: Urea, Ammonium Nitrate, Iron HEDTA, Manganese EDTA and Zinc EDTA.
Chelating agents are Hydroxyethylethylenediaminetriacetate and Ethylenediaminetetraacetate.

METHOD OF APPLICATION	SUGGESTED RATE PER ACRE	
	Field Crops	Tree or Vine Crops
Soil banded, injected, side dress, drip tape, or micro sprinklers	up to 1 quart	up to 1 quart
Sprinklers: solid set, drag lines, linear, or pivot @ 100% speed	up to 2 quarts	up to 2 quarts
Soil broadcast spray incorporated, flood or furrow irrigated	up to 3 quarts	up to 3 quarts

DIRECTIONS FOR USE

•Shake well before use. •Designed to be applied to the soil. •FERTIL HUMUS® should be applied when soil analysis identifies the need and proper rate of application for this product. •Best results will be obtained when application is concentrated in the active root zone. For tree & vine crops, first application should be 15 to 20 days before planting, bud break or root flush or at the onset of dormancy. For field crops, apply post harvest onto crop stubble, compost, or manure followed by shallow cultivation. •Can be applied in combination with compatible plant growth regulators, pesticides, or other liquid fertilizers. •If compatibility is in question, jar test a small quantity. •Do not apply this product in concentrations greater than 10%. •Do not apply HUMA GRO® nutrients during the hottest time of the day or to plants under drought or flood stress. •Application timing, intervals and rates may vary according to individual crop requirement, stage of development, available nutrient levels in the soil, and overall nutritional status of the crop. •Applications can be made as often as every 15 to 20 days as needed. •Soil moisture is required for maximum bioactivity. If soil is dry, moisture should be provided by irrigation. •Consult your local HUMA GRO® Representative or other agricultural specialist for crop-specific recommendations.

•Do not store this product below 50°F (10°C) or above 90°F (30°C).

This product is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by agriculture crops.

Conditions of sale:

The information contained on this label is believed to be accurate and reliable. Buyer and user acknowledge and assume all liability resulting from the use of this material. Follow directions carefully. Timing, method of application, weather, crop conditions and other factors are beyond the control of the seller.

CAUTION: KEEP OUT OF REACH OF CHILDREN
