Science-Driven NutritionSM

Directions for Commercial Use:

Foliar: Apply 1 to 3 gallons per acre with sufficient water for thorough coverage. For best results, spray in early morning or late afternoon. Do not apply during the "sunlight" hours when air temperature is above 85 F. Foliar fertilization is intended to supplement standard ground fertility programs and will not by itself provide all nutrients normally required by agricultural crops. Ground: Apply 2 to 4 gallons per acre. Ground application can be via conventional ground sprayer or metered through irrigation. If you have any questions regarding mixing or application rates contact your Agro-K dealer before using this product.
