PRODUCT INFORMATION

GENERAL INFORMATION

MINERAL SPRAY ZIP is a highly concentrated nutritional solution. It is designed to meet the need for a soluble liquid minor element spray containing certain nutrients proven to be of value when applied as a properly timed foliage spray. **MINERAL SPRAY ZIP** is completely available for plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue of the plant and quickly translocated to deficient areas of the plant. **MINERAL SPRAY ZIP** is compatible with most insecticides and minor elements. It is designed for use as a supplement to a well balanced fertilizer program.

MINERAL SPRAY nutrients can be applied by conventional ground rig, concentrate sprayer, and by air. For improved leaf absorption add 1 -3 qts. per acre of **NUTRAPLEX*** with Mineral Spray products. **MINERAL SPRAY ZIP** also has a buffering effect on hard water.

With farms becoming larger and more specialized and farmers desiring to get crops planted earlier there definitely is a trend for applying less fertilizer at planting time and broadcasting or side-dressing larger quantities at other than planting time. **MINERAL SPRAY** products are designed to supplement a well balanced fertilizer program and ensure the plants obtain proper nutrients during high growth periods which is so essential to high yields. **MIN-ERAL. SPRAY ZIP** provides a fast method of giving plants a nutrient boost thru leaf absorption. **MINERAL SPRAY** products will protect crops from nutrient deficiencies during those crucial growing periods when any drop in nutrients will result in a production drop.

MINERAL SPRAY nutrients have corrected deficiencies of a great many row crops, vegetables, and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soils (pH 3) to high alkaline soils (pH 8.5) containing considerable calcium carbonate (free lime). **MINERAL SPRAY ZIP** is effective under dry land and irrigation farming conditions. Differences in soil conditions, climate and plant varieties will determine how much more effective **MINERAL SPRAY** nutrients are than other sources of nutrients.

***NUTRAPLEX** is a Registered Trademark of Western Nutrients Corporation consisting of lignin base micronutrients.

NET CONTENTS
5 GALLONS / 18.93 LITERS
DIRECTIONS

- ALFALFA** — 1-2 qts. per acre prior to bloom. Repeat every 2-3 weeks.
ARTICHOKES — 1-2 qts. per acre at bud stage. Repeat every 2-3 weeks.
AVOCADOS — 1-2 qts. per acre pre-bloom.
BLACKBERRIES, BOYSENBERRIES, RASPBERRIES, STRAW-BERRIES and other small fruits — 1 qt. per acre pre-bloom.
BROCCOLI, BRUSSEL SPROUTS — 1 qt. per acre. 1 -3 applications.
CARROTS — 1 qt. per acre as often as needed.
CAULIFLOWER, CABBAGE — 1 qt. per acre. 1 -3 applications. **CITRUS** — 1-2 qts. per acre pre-bloom.
CORN — 1 qt. to 20 gallons of water per acre. Apply when tassels first appear.
COTTON — 1 qt. per acre prior to bloom. Make 4-6 applications.
CUCUMBERS — 1 qt. per acre pre-bloom. Make 4-6 applications.
DECIDUOUS FRUIT and NUT TREES — 1-2 qts. per acre pre-bloom and petal fall.
GRAPES — 1-2 qts. per acre prior to bloom. Make 3 applications. **LETTUCE, CELERY** — 1 qt. per acre as often as needed. **MELONS** — 1 qt. per acre, pre-bloom. Make 4-6 applications.
ONIONS — 1 qt. per acre as often as needed.
PEAS and BEANS — 1 qt. per acre prior to bloom.
PEPPERS, GARLIC — 1 qt. per acre as often as needed.
POTATOES — 1-2 qts. per acre as often as needed.
SPINACH — 1 qt. per acre as often as needed.
SQUASH — 1 qt. per acre pre-bloom. Make 4-6 applications.
SUGAR BEETS — 1 qt. per acre. Make several applications.
TOMATOES, EGGPLANT — 1 qt. per acre at first bloom. Repeat before and during fruiting period.
WHEAT, BARLEY, MILO, RICE and OTHER GRAIN CROPS — 1 qt. per acre seeding and pre-bloom.
