PRODUCT INFORMATION

START - UP W.R.C.M. Chelate Solution was formulated for use with basic starter fertilizers pH 6 or higher at planting time. **START - UP** W.R.C.M. Chelate Solution can be incorporated in basic liquid fertilizers at time of planting, side dressing application, or other situations where it is difficult to get micronutrients to the root zone.

START - UP is composed of organic carriers of Citric Acid which forms a very strong chelated bond when processed.

W.R.C.M. becomes more available when combined and applied with a good nitrogen source. To insure that maximum uptake is obtained we have incorporated a nitrogen source in our **START - UP** product line.

"INFORMATION REGARDING THE CONTENTS AND LEVELS OF METALS IN THIS PRODUCT IS AVAILABLE BY CALLING 1-800-542-6664".

START-UP is a Registered Trademark of Western Nutrients Corporation.
