SPRAY MIX COMPATIBILITY

R.E.M.™ is compatible with most liquid fertilizer spray mixes at manufacturers specified label rates. However, it is recommended that a "jar test" be performed prior to actual application. In the event of fertilizer compatibility problems, the addition of a stabilizing/compatibility agent is recommended.

MIXING GUIDE

1. Water
2. Other Fertilizers
3. R.E.M.™
4. Approved compatibility agent (if needed according to jar test)

SUGGESTED DIRECTIONS

Use 0.5 gallon per acre as a banded or broadcast spray to soil or apply in irrigation water (sprinkler, micro, flood or furrow). R.E.M.™s recommended to be applied in combination with 1-2 qts. per acre of **Hydra-Hume™ AN**.

TURF AND ORNAMENTALS: Broadcast spray or inject into irrigation at 6 oz. per 1000 sq. ft. 1 — 3 times during the season. Application is targeted at the soil but foliar contact is not detrimental. Mix with deep root injections at 1 gallon per 10 gallons of injection solution.
