GENERAL INFORMATION

Aqua-Gro® TDG is a blend of surfactant chemistries specifically designed and developed to correct hydration and water/solute distribution problems associated with soils, peat and/or bark media during production and post-production periods.

Read **CAUTION** and precautionary statements carefully before use.

BENEFITS

- Distributes water and chemicals evenly throughout the container
- Improves size and uniformity of root and shoot growth
- Improves air to water ratios
- Reduces dry pockets or drying around edges of containers
- Improves plant survival after shifting crops
- Can be conveniently applied using broadcast or topdress methods
- Ensures uniform water movement and hydration of root-zone
- Distributes water and chemicals evenly throughout the container
- Results in increased plant growth with more uniform root growth and distribution
- Lowers production costs due to water use efficiency, by reducing production time and reducing hand watering
- Increases plant survival during production and in the stressful retail environment
- Reduces plant losses, increasing your profits
