

Micro Clean Concentrate

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Concentrate causes eye irritation. Harmful if swallowed. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse. Do not contaminate feed and foodstuffs.

ENVIRONMENTAL HAZARDS

Do not contaminate water when disposing of equipment washwaters.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Get medical attention. **IF ON SKIN:** Wash with plenty of soap and water. Get medical attention if irritation persists. **IF SWALLOWED:** Call a physician or Poison Control Center. Do not induce vomiting. Drink promptly large quantities of water. Avoid alcohol. Do not give anything by mouth to an unconscious person. **IF INHALED:** Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

GENERAL INFORMATION

MICRO CLEAN CONCENTRATE is a combination water treatment, scale preventative and soil penetration aide. It is designed for use as both an additive to liquid fertilizer mixes to be applied through drip or micro-irrigation systems and as a stand alone system maintenance additive.

COMPATIBILITY

MICRO CLEAN CONCENTRATE is compatible with most common liquid fertilizer mixes. However, if the desired combination has not been previously used, a compatibility test is recommended.

DIRECTIONS FOR USE

Use in strict accordance with precautions, warnings and directions for use.

FOR LINE MAINTENANCE USES: Specific use rates will vary with water hardness. As a general rule a final concentration of 1 to 3 ppm is sufficient to prevent scale formation which can clog jets and

CORROSIVE MATERIAL

See side panel for First Aid and Additional Precautionary Statements.

CONDITIONS OF SALE AND WARRANTY

Monterey AgResources (MAR) warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. MAR neither makes, nor authorizes any agent or representative to make, any other warranties, express or implied, including fitness or merchantability.

The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of MAR and Seller. Buyer and user acknowledge and assume all risks and liability resulting from the handling, storage and use of this material not in strict accordance with directions given herewith. In no case shall MAR or the Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by MAR and is accepted as such by the Buyer.

- 30 GALLONS / 113.56 LITERS
- 260 GALLONS / 984.21 LITERS

emitters. This is equivalent to 40 to 120 ounces per acre-foot of water being applied. The use of a chemical feed pump is recommended for continuous application. The actual rate will depend on the quality of water being used.

FOR ADDITION THROUGH LIQUID FERTILIZER INJECTION: Fertilizer use rates vary widely. At a dilution rate of 1 gallon of fertilizer to 5000 gallons of water, 1 gallon of MICRO CLEAN CONCENTRATE per 100 gallons of fertilizer mix is recommended. Jar test before adding MICRO CLEAN CONCENTRATE to the fertilizer blend to ensure compatibility.

CLEANING FOULED SYSTEMS: High rates (5-10 ppm) on a continuous basis for 10 to 14 days have been shown effective in cleaning scaled systems. It is best to flush lines free of microbiological slimes before attempting to clean scale. Completely clogged emitters must be replaced. MICRO CLEAN CONCENTRATE works on the surface of the scale and causes a change in the scale's crystal structure to allow it to slough off and be flushed out of the system. Heavily scaled systems may require acid cleaning or replacement of scaled components.

STORAGE AND DISPOSAL

**DO NOT CONTAMINATE WATER, FOOD OR FEED
BY STORAGE OR DISPOSAL.**

STORAGE: Store in original container away from children, foods and feeds. **PRODUCT DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER DISPOSAL:** Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.
