

Monterey ST-K™

Patented chemistries for enhanced protection
and availability of Potassium – a liquid formulation.

GUARANTEED ANALYSIS

1-0-7

Total Nitrogen (N)	1.0%
1.0% Nitrate Nitrogen	
Soluble Potash (K ₂ O)	7.0%
Sulfur (S)	0.6%

Derived from potassium nitrate, potassium sulfate and muriate of potash.

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

KEEP OUT OF REACH OF CHILDREN
CAUTION: HARMFUL IF SWALLOWED

DIRECTIONS FOR USE

GENERAL INFORMATION: MONTEREY ST-K contains two primary plant nutrients and is designed to correct potassium deficiencies. This product is designed for easy mixing with water and applied through fertilizing equipment or injected into irrigation systems.

This product has a low salt index, so it is ideal for use in planter band and foliar applications. MONTEREY ST-K will quickly boost plant growth during critical or high growth periods and can help prevent damage due to weather.

MONTEREY ST-K is recommended for use on, but not limited to, vegetable and row crops, deciduous fruit and nut trees, citrus, avocados, vine and berry crops, ornamentals, turf, pasture and range grasses.

COMPATIBILITY: MONTEREY ST-K may be applied separately or in conjunction with most other fertilizers. This product is compatible with most acid based fertilizers and other plant nutrients. However, a compatibility test is recommended if the desired combination has not been previously used.

Use only stainless steel or poly pumps, fittings and hoses. Use of any other type of equipment may result in damage to the handling system.

APPLICATION METHOD: Soil applications of MONTEREY ST-K can be incorporated in liquid fertilizer or applied separately. This product is most effective when applied through an irrigation system or banded. If using center-pivot irrigation equipment, use only with electric or oil hydraulic drive systems that provide a uniform water distribution.

MIXING: Add MONTEREY ST-K to a partially filled tank and slowly add the remaining water while maintaining constant agitation. Always add this product to the spray tank before adding other agricultural chemicals.

APPLICATION RATES: Apply 2 to 10 gallons per acre of MONTEREY ST-K mixed with compatible fertilizers. To use MONTEREY ST-K alone, apply the following rates if you do not have a soil or leaf analysis:

Mild Deficiency 2-6 gals./acre

Moderate to

Severe Deficiency 6-10 gals./acre

After initial application, monitor petiole potassium levels and apply again as needed.

CONDITIONS OF SALE AND WARRANTY

Monterey AgResources (MAR) warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. MAR neither makes, nor authorizes any agent or representative to make, any other warranties, express or implied, including fitness or merchantability.

The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of MAR and Seller. Buyer and user acknowledge and assume all risks and liability resulting from the handling, storage and use of this material not in strict accordance with directions given herewith. In no case shall MAR or the Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by MAR and is accepted as such by the Buyer.
