### PRODUCT INFORMATION

BINDER is an effective compatibility agent for pesticide mixtures and pesticides to be mixed with liquid fertilizers. When used at the recommended label rate, BINDER improves the stability of these mixtures and the uniformity of their application. BINDER is most effective when added before incompatibilities occur. BINDER may be useful to reverse incompatibilities but generally will require higher rates.

### DIRECTIONS FOR USE

BINDER is completely soluble in most liquid fertilizers, and should be added to the fertilizer at the suggested rates, and mixed thoroughly prior to the addition of the pesticide. The entire mixture should be agitated sufficiently, to provide a uniform suspension, and agitation should be continued during application if possible.

**NOTE:** Consult pesticide manufacturer for recommendation of their product in liquid fertilizers.
