FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF TEXAS

Dual MAGNUM[®]

EPA Reg. 100-816
EPA SLN No. TX-100014

SPLIT APPLICATIONS OF DUAL MAGNUM FOR WEED CONTROL IN LIMA BEAN

KEEP OUT OF REACH OF CHILDREN

CAUTION

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR WEED CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Follow all applicable directions, restrictions, and precautions including statements pertaining to the Worker Protection Standards, on the EPA-registered Dual MAGNUM label.

This labeling must be in the possession of the user at the time of herbicide application.

Important: Do not apply Dual MAGNUM by irrigation for crops on this label.

LIMA BEAN

Apply Dual Magnum preplant, preplant incorporated, or preemergence for control or suppression of yellow nutsedge, annual grasses, and small-seeded broadleaves. In general, the risk of crop injury from the use of Dual Magnum Herbicide is greater from preplant incorporated than from preplant non-incorporated or preemergence applications. Rainfall or irrigation immediately following Dual Magnum application will increase the risk of crop injury

Dual Magnum use rates in lima beans:

Soil Type	<3% OM	≥3%OM
Coarse	1-1.33 pt/A	1.33 pt/A
Medium	1.33-1.67 pt/A	1.33-1.67 pt/A
Fine	1.33-1.67 pt/A	1.67-2.0 pt/A

Split application

Dual Magnum may also be applied as a split application where ½ of the use rate is applied preplant, preplant incorporated or preemergence and the other ½ use rate is applied as a row middle treatment with a hooded or shielded sprayer prior to initiation of pods. Lima beans treated under the split application method can be harvested at normal timing.

Restrictions:

1. Do not apply more than 2.0 pts./A of Dual Magnum during any one crop year
2. Do not cut hay within 120 days following a Dual Magnum application.
3. Do not use for forage within 60 days following a Dual Magnum application.
