Lorsban[®] Advanced

EPA Reg. No. 62719-591

Special 2(ee) Recommendation[†]

(For Distribution and Use Only in the States of Connecticut, Massachusetts, Michigan, and Rhode Island)

Control of Grape Mealybugs and Cutworms in Grapes

ATTENTION

[†]This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Lorsban[®] Advanced insecticide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Lorsban Advanced according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Lorsban Advanced.

Directions for Use

Refer to product label for Lorsban Advanced for Use Precautions and Restrictions, Mixing and Application instructions.

For control of cutworms, apply 1 quart of Lorsban Advanced per acre as a broadcast spray in a minimum spray volume of at least 50 gallons of water using power-operated ground spray equipment. Treat when cutworms first become active and when field counts indicate damaging insect populations are developing or present. Do not apply after bloom stage of growth. Consult your state agricultural experiment station or extension service specialist concerning cutworm control practices in your area.

For control of grape mealybugs, apply 1 quart of Lorsban Advanced per acre in a minimum spray volume of at least 50 gallons of water per acre using power-operated ground spray equipment only prior to late budbreak. Applications after budbreak may result in transient leaf yellowing (Concords).

Refer to the product label for Lorsban Advanced for all of the specific use restrictions for use of this product on grapes.
