

Fluid Fertilizer 17-3-5 with LN3[®] Nitrogen

FEATURES & USE TIPS:

- Features LN3[®] water-soluble, controlled-release nitrogen.
- Contains a proprietary high concentration of LN3[®] as the slow-release nitrogen source.
- Clear solution for storage stability.
- Designed for spray application - no clogging.

PRODUCT SPECIFICATIONS:

N (12%):	12.75% Urea Nitrogen 4.25% Other Water Soluble Nitrogen* <small>*4.25% Slowly Available Nitrogen from urea-triazone solution</small>
P - as P₂O₅ - (3%):	Tetrapotassium pyrophosphate
K - as K₂O - (12%):	Potassium carbonate

Following is a specimen label that may at some point be revised or otherwise become out of date. It is intended as a guide in providing general information regarding the use of this product. Always read and follow the label on the product container.

PRODUCT SHEET

PRODUCT CODE:

AGC174AV5

AGC174AV30

AGC174AV250

Date: 062207

Supersedes: 000000

Label: E6

PRODUCT CHARACTERISTICS:

Product Type:

Liquid Fertilizer

Nitrogen Type:

Urea-triazone solution

Net Volume:

5 / 30 / 250 Gallons

Coverage:

2.1 / 12.59 / 104.95

Acres @ 0.1lb. N/M

GOLF PRODUCTS®

Fluid Fertilizer

17-3-5

with **LN₃**™ Nitrogen

- Contains LN₃™ controlled-release nitrogen for consistent, predictable growth and extended nitrogen feeding.
- Contains Proactin®
- Ideal for spray application, fertigation, tree and shrub root-feeding, landscape and arboriculture applications.
- Provides the ideal complement to a granular fertility program.

10.55 Lbs per Gallon

Net Contents 30 Gal (113.4 liters)

Fluid Fertilizer 17-3-5

with LN₃™ Nitrogen

GUARANTEED ANALYSIS

Total Nitrogen (N)	17.00%
12.75% Urea Nitrogen	
4.25% Other Water Soluble Nitrogen*	
Available Phosphate (P ₂ O ₅)	3.00%
Soluble Potash (K ₂ O)	5.00%
Plant nutrients derived from: urea-titration solution, urea, tetrapotassium pyrophosphate, potassium carbonate	
Non-plant food ingredients: liquid protein	
*4.25% Slowly available nitrogen from urea-titration solution	
Information regarding the contents and levels of metals in this product is available on the internet at http://www.regulatory-info-ap.com .	

PRODUCT SPECIFICATIONS:

10.55 Pounds Per Gallon	
Specific Gravity:	1.218
Pounds of Nitrogen per gallon:	1.79
Pounds of Phosphate per gallon:	0.32
Pounds of Potash per gallon:	0.58

DIRECTIONS FOR USE:

Turf Applications: Fluid Fertilizer 17-3-5 may be applied as a foliar spray application on all turf grasses (cool, transitional, and warm season) including lawns, athletic fields and golf courses; lawns, greens, and tees. Apply anytime during the growing season, from the time turf first starts greening up in spring until active growth in the fall. May be applied to wet or dry foliage. Multiple applications enhance performance of this product. A sound fertility program is most effective when used continually in conjunction with granular products spaced throughout the growing season. Consult your distributor sales representative for a customized application program utilizing Anderson granular and fluid fertilizer products. Water turf prior to next mowing to remove any remaining product from foliage.

Dilution Information: Determine desired N application rate and the intended dilution. Fertilizer should be applied as a spray solution volume of 2 - 4 gallons/1000 square feet).

Low N application rates (0.1 - 0.2 lbs. N/M) may be repeated at 10 - 14 day intervals. Moderate N applications rates (0.3 - 0.5 lbs. N/M) may be repeated at 2 - 4 week intervals.

Tank Mixing: Add 1/2 of the total water to the spray tank. Activate sprayer agitation, measure appropriate volume of fertilizer concentrate and add to the spray tank. Bring spray tank to total volume of water. No special agitation is needed. If tank mixing with pesticides, test compatibility before adding to spray mix. Perform a small jar test.

Application Rate Lbs. N/1,000 Sq. Ft.	Fluid Ounces/ 1,000 Sq. Ft.
0.1	7.0
0.2	14.0
0.3	21.0
0.4	28.0
0.5	35.0
1.0	71.0

Fertilizer should be applied in 2-4 gallons of spray solution

Tree and Ornamental Applications:

Deep Root Feeding: Apply Fluid Fertilizer 17-3-5 in spring after the last frost but prior to bud opening. In the fall, delay application until tree has dropped most of its leaves or soil temperature is 50° F or less. Inject 17-3-5 into the top 4 - 8 inches on a grid pattern two to three feet apart so that the area below the tree canopy plus one third of the area outside the canopy will be treated. Suggested rates of application are 1 to 3 pounds of N per thousand square feet (71 - 213 fluid ounces).

Pounds of N per inch	DBH Method	Amount of fertilizer per 100 gallons water
1/18		71 oz.
1/12		106 oz.
1/6		212 oz.

Apply 5 gallons of tank mix per inch diameter. Always measure diameter at 4 1/2 feet above ground.

Foliar Sprays: May be used in foliar tree and shrub feeding program and applied in conjunction with a crop protection chemical program. It is recommended to do a "jar test" for compatibility. A suggested rate of application is one gallon of product per 100 gallons of spray solution. For concentrated sprays of less than 100 gallons, reduce the rate of product to stay within the recommended solution ratio. **CAUTION** - should be exercised by the professional applicator before applying 17-3-5 to sensitive trees and shrubs.

Fertigation: For fairway turf, follow rates recommended by fertigation equipment and existing fertility program. For horticultural applications, follow Best Management Practices for crop being grown and the type of fertigation equipment being used. Take into account other products being applied through fertigation equipment prior to using Fluid Fertilizer 17-3-5 product.

Caution: Please keep out of reach of children.

May cause eye and skin irritation. Avoid contact with eyes, skin or clothing. May be harmful if inhaled. Avoid breathing mist. In case of contact, immediately flush eyes or skin with plenty of water. Discontinue use and get medical attention if irritation persists. Wear safety goggles and gloves to minimize exposure.

Precautions:

Test chemical compatibilities before tank mixing. Do not apply to foliage of any plant when temperatures are above 90°. Not recommended for use when planting new turf areas. A high phosphorus fertilizer should be used.

Storage and Use:

Store in a cool dry place. Do not store in temperatures above 95°. Keep from freezing.

IMPORTANT: READ BEFORE USE:

Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If items are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following Warranty Disclaimer and Limitation of Liability:

WARRANTY DISCLAIMER and LIMITATION OF LIABILITY:

Manufacturer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions.
