

MOSQUITO CONTROL

General Information

INTRODUCTION

ZOECON ALTOSID Pellets WSP (ALTOSID Pellets WSP) release ALTOSID, an Insect Growth Regulator as they erode. ALTOSID Pellets WSP prevent the emergence of adult standing water mosquitoes, including Anopheles, Culex, Culiseta, Coquillettidia, and Mansonia spp., as well as adults of the floodwater mosquitoes, such as Aedes, Ochlerotatus, and Psorophora spp. from treated sites.

GENERAL DIRECTIONS

ALTOSID Pellets WSP release effective levels of ALTOSID Insect Growth Regulator for up to 30 days under typical environmental conditions. Continue treatment through the last brood of the season. Treated larvae continue to develop normally to the pupal stage where they die.

NOTE: This insect growth regulator has no effect on mosquitoes which have reached the pupal or adult stage prior to treatment.

ALTOSID Pellets WSP are convenient ready-to-use pouches for treating mosquito breeding sites. The pouches are water-sensitive and when in contact with water, the pouches dissolve, releasing the pellets. Use care when handling unused pouches so that moisture does not collect on the pouches. Keep pouches sealed in the original package until ready for use. Once outer foil bag containing water soluble pouches is opened, use pouches within one day.

Limitations, Restrictions, and Exceptions

APPLICATION SITES

ALTOSID Pellets WSP are effective against Anopheles, Culex, Culiseta, Aedes, Ochlerotatus, Coquillettidia, Mansonia and Psorophora mosquito species. Use pouches to treat small bodies of water such as: catch basins, storm drains, roadside ditches, tree holes, flooded crypts, transformer pits, fish ponds, woodland pools, fountains, septic tanks, ornamental ponds, manmade depressions, animal watering

troughs, ditches, and other natural or artificial water-holding containers.

APPLICATION RATE

Place one pouch into each catch basin. For other mosquito breeding sites, one pouch will treat single containers or treatment sites of up to 135 sq ft of surface area. ALTOSID PELLETS WSP will provide up to 30 days control of emerging adult mosquitoes.
