

POTATOES - DIRECT INJECTION

General Information

StorOx 2.0 works best when diluted with water with minimal levels of organic or inorganic materials, and with water having a neutral pH. Thoroughly rinse out tank with water before mixing concentrate. StorOx 2.0 will readily mix with clean, neutral water and does not require agitation.

StorOx 2.0 concentrate should not be combined or mixed with any other pesticide concentrates.

Limitations, Restrictions, and Exceptions

DIRECT INJECTION INTO HUMIDIFICATION WATER FOR POST-HARVEST POTATOES IN STORAGE

(Processing, Seed and Table Stock)

Directions

Inject concentrate into makeup water used in humidification of postharvest potatoes in storage.
