

1/2 LB. N - 2 GALLONS PER 1000 SQ FT

General Information

GENERAL INFORMATION :

Endurance 20-3-3 is a general purpose liquid turf fertilizer solution made from the highest quality N-P-K sources. Both the phosphorus and potassium are water soluble and are derived from non-chloride sources. Endurance 20-3-3 will not clog or cause abrasion to equipment and is compatible with fungicides, herbicides, and insecticides and can be mixed and sprayed in one application to save time and labor. No special agitation is needed. Endurance 20-3-3 has a neutral pH and is not corrosive.

TEES, GREENS AND FAIRWAYS

Turf Applications: Endurance 20-3-3 can be applied from early spring throughout the growing season on warm, transitional and cool season grasses. Apply 1/4 lb. N to 1 lb. N per 1,000 square feet. Dilute with water according to desired nitrogen rate.

Tees and Greens: Apply on tees and greens at desired rate with a spray unit applying no less than 1 gallon per 1,000 square feet. Apply every 10-14 days. Always perform a jar test before mixing with other products in your tank.
