

# SHRUB OR TREE PLANTING

## General Information

### GENERAL INFORMATION

Zeba is a biodegradable, non-toxic, starch-based superabsorbent polymer. It is designed to rapidly absorb and maintain moisture in the root zone, releasing moisture to plants as needed.

### Limitations, Restrictions, and Exceptions

#### Shrubs/Tree Planting

Use 1/2 Tbsp. per gallon [1/2 Tbsp. per 4 Liters] of soil or 1/8 cup per 12 inches (1/8 cup per 30 cm] of root ball. Place half the Zeba in the planting hole and mix the remaining half in the backfill soil.
