

PARSNIPS

General Information

PRECAUTIONS AND RESTRICTIONS

BUFFER ZONES FOR AERIAL APPLICATION: When making a Non-ULV application with aerial application equipment, a minimum buffer zone of 25 feet must be maintained along any water body.

APPLICATIONS

Use higher rate when foliage is heavy or infestation is severe. Apply when pests first appear. Apply the following specified rates in sufficient water to thoroughly cover one acre. By ground, apply using a minimum of 10 gallons of water/A and by air apply using a minimum of 2 gallons of water/A (standard is 100 gallons of water for thorough coverage sprays). Do not apply orchard rates in less than 10 gallons of water per acre.

Limitations, Restrictions, and Exceptions
