

## **FOR COMPLETE, NONSELECTIVE WEED AND GRASS CONTROL**

### General Information

### DIRECTIONS FOR USE

For household use only. Not for use indoors.

This product may be used in many places around your yard where you do not want anything to grow; such as driveways, gravel parking areas, walkways and paths, along fences, around buildings, and under decks.

### USE PRECAUTIONS

This product is nonselective in action and may destroy all types of vegetation. The treated area may be totally or partially non-productive for one or more years. Apply only to areas where complete plant control is desired. Do not apply to areas on slope above lawns or susceptible crops as runoff water from treated area could cause injury.

### Limitations, Restrictions, and Exceptions

#### **FOR COMPLETE, NONSELECTIVE WEED & GRASS**

**CONTROL** - Apply the contents of this container to 250 sq ft (higher rate) to 300 sq ft (lighter rate) of area. The lighter rate may be used if the weed infestation is primarily annuals. For perennial weeds and in dry soil areas the higher rate should be used. Dead weeds from previous seasons' growth do not need to be removed.

Apply this product from late fall through early spring. Applications in the Northeast and upper Midwest should be made in early spring after the ground has thawed. Do not apply to frozen ground or over the top of snow. For prompt and effective results, rainfall or other precipitation should occur within a few days of application. If air temperatures are expected to rise above 70 degrees F within one week following application, immediately

scratch or water the granules into the soil. Do not seed or transplant into the treated area for 24 months.

Control of existing vegetation, such as shallow-rooted grasses and annual weeds, will occur two to three weeks after application.

Application is limited to once per year at a maximum rate of 2.8 lbs. per 250 square feet.
