

LAWNS

General Information

DIRECTIONS FOR USE

SHAKE WELL BEFORE USING.

Apply this product using the hose-end applicator provided.

It will accurately dilute the concentrated weed control for convenient spray-on application. Application dates may vary for both spring and late summer/early fall applications from year to year, according to weather conditions.

This product is made from a plant-based corn byproduct through a patented production process. It works by releasing organic dipeptides into the soil, causing the roots of weeds to fail to grow properly and die out.

APPLICATION RATE

Spray the contents of bottle evenly over 1,000 sq. ft. of established lawn or garden areas.

SPRING: Apply to established turf or plants in early spring before weed germination.

FALL: Apply after summer heat stress has passed.

SHAKE WELL BEFORE USING

INSTRUCTIONS FOR HOSE END ATTACHMENT CONTAINERS

1. Shake container thoroughly, then attach to garden hose.
2. Turn on water supply at the source. Water pressure will build in hose since the sprayer is already in the "OFF" position.
3. To apply product, bend safety tab and turn the control valve clockwise to the "ON" position.
4. For best results, hold sprayer and bottle level, and direct spray in a sweeping side-to-side movement. Spray the contents of bottle evenly over the lawn surface. Refer to the "Application Rate" section on this label for the application rate and treatment areas. Do not overlap areas already sprayed.
5. When spraying is complete, turn the control valve back (counterclockwise). Turn the water off. Disconnect hose from applicator and store product in original container.

Limitations, Restrictions, and Exceptions

LAWNS

This product is to be applied to mature lawn areas having a well developed root mass. Do not apply the product on newly seeded areas as it may inhibit seeds from germinating. Wait until after first mowing when root systems are established. In late summer/early fall, apply after heat stress has passed. If over-seeding or re-sodding in the fall, do not apply the product in the fall.

This product may be used up to four times per growing season.
