Do not graze or feed lawn or sod clippings to livestock. MAXFORCE COMPLETE BRAND GRANULAR INSECT BAIT contains a special blend of foods, combined with the delayed-action stomach poison, hydramethylnon.

The delayed action of the active ingredient allows foraging ants to bring the bait back to the nest so that the entire colony, including the queen, is destroyed. When properly used, this bait will control many of the following insects, including ants, cockroaches¹, crickets, and silverfish before they can enter a structure. Expect to see fewer insects within a week.

MAXFORCE COMPLETE BRAND GRANULAR INSECT BAIT bulk container may be used on the job site or to fill this product's refillable service containers. The bulk container will refill approximately 8 refillable service containers. Reuse only those service containers with current and legible labels.
