

ALMONDS

General Information

GENERAL INFORMATION

FOLI-GRO Western Mix is designed primarily for foliar applications to prevent or correct micronutrient deficiencies in a wide range of agronomic and ornamental plants. Its use is suggested as a supplement to a regular, balanced fertilizer program to enhance yields and improve quality. Application of FOLI-GRO Western Mix is a means of obtaining a quick response to needed elements. Foliar applications of FOLI-GRO Western Mix may be particularly beneficial during periods of peak nutrient demand, for crops grown on soils having poor nutrient availability or to crops suffering from a weakened root system. FOLI-GRO Western Mix should be used as part of a comprehensive Total Nutrition System for optimizing plant growth, development, yield, and quality.

Limitations, Restrictions, and Exceptions

Preferred timing of application is from delayed dormant to pink bud. For post bloom, post harvest and soil application, please consult general application recommendations.
