

SOIL OR WATER IRRIGATION APPLICATIONS

General Information

GENERAL INFORMATION

FOLI-GRO HUMI-K is designed primarily for foliar applications to prevent or correct potassium deficiencies in a wide range of agronomic and ornamental plants. Its use is suggested as a supplement to a regular, balanced fertilizer program to enhance yields and improve quality.

Application of FOLI-GRO HUMI-K is a means of obtaining a quick response to needed elements. Foliar applications of FOLI-GRO HUMI-K may be particularly beneficial during periods of peak nutrient demand, for crops grown on soils having poor nutrient availability or to crops suffering from a weakened root system. FOLI-GRO HUMI-K should be used as part of a comprehensive Total Nutrition System for optimizing plant growth, development, yield and quality.

DIRECTIONS FOR USE

FOLI-GRO HUMI-K may be applied as a foliar spray by air, ground concentrate or dilute. Maintain agitation to provide uniform distribution within spray tank. Use of a high quality CPDA approved spreader at recommended rates to improve spray cover is usually advised. Do not apply when plants are under excessive heat or moisture stress. Applications of foliar nutrients to leafy vegetables or soft-skinned fruits during periods of excessive temperatures may cause cosmetic injury. Applications of certain micronutrients to fleshy fruits within 30 days of harvest may result in staining of rind or skin.

FOLI-GRO HUMI-K can be applied to soil, in irrigation water or as a foliar spray by air, ground concentrate or dilute on all agricultural and horticultural crops, ornamental plants and sports turf to enhance growth and quality and to correct potassium deficiencies.

As a foliar spray the use of a high quality spreader at recommended rates to improve spray cover is usually advised. Maintain agitation to provide uniform distribution within spray tank. Do not apply when plants are under excessive heat or moisture stress. Always use no less than 10 gallons of water per acre when applying

FOLI-GRO HUMI-K as a foliar spray.

FOLI-GRO HUMI-K contains 2.99 pounds of potassium per gallon. Timing of treatments should be based on crop nutrient demand, prevailing environmental conditions, plant tissue analysis data or other information that indicates a need for fast acting, supplemental potassium.
