

IMPORTED FIRE ANT (IFA) QUARANTINE TREATMENT (SOIL INCORPORATION)

General Information

GENERAL APPLICATIONS INSTRUCTIONS

Bifenthrin Golf & Nursery 7.9F controls numerous insects and mites on trees, shrubs, foliage plants, non-bearing fruit and nut trees, and flowers in greenhouses. Non-bearing crops are perennial crops that will not produce a harvestable raw agricultural commodity during the season of application.

Spreader stickers are not necessary with Bifenthrin Golf & Nursery 7.9F.

Bifenthrin Golf & Nursery 7.9F can be tank-mixed with insect growth regulators, other pesticides and other aqueous carriers. Observe all precautions and Directions for Use for each product. Physical compatibility may vary with different combinations of products, so prepare a small scale (pint or quart jar) test sample for any combination not tested previously. Use proper proportions in the small scale test to achieve the correct result.

Maximum rates: DO NOT apply more than 0.2 lb. ai/acre (40 fl. ozs. of Bifenthrin Golf & Nursery 7.9F) in a single application or per year for outdoor applications.

Resistance:

When products are used repeatedly for control, some insects are known to build up resistance, but this can not be predicted. This product should conform to resistance management strategies established for the use area. Check with your local or state pest management authorities for more information.

This product, or other products with a comparable modes of action, may not provide sufficient control if resistance should develop in your area. A resistant species may be present if poor efficacy can not be linked to extreme weather conditions or improper treatment. Consult pest management advisors for the other methods of control for your area if you believe resistance is a factor.

Refer to the label for Dilution Chart.

Limitations, Restrictions, and Exceptions

IMPORTED FIRE ANT (IFA) QUARANTINE TREATMENT

For Imported Fire Ants (IFA) in Potting Media (including balled and containerized nursery grown ornamental trees, shrubs, plants, flowers, conifers, bushes, Christmas trees, and non-bearing fruit and nut-trees). Bifenthrin Golf & Nursery 7.9F is approved and can be used in accordance with the USDA Imported Fire Ant Quarantine Program. Bifenthrin Golf & Nursery 7.9F may be applied either as a high volume drench treatment, soil incorporated, or as a topical application.

Soil Incorporation: By sprinkling or spraying it onto the media, incorporate the appropriate volume of Bifenthrin Golf & Nursery 7.9F (see table on the label) per cubic yard of potting media by diluting it in water (typically 1 quart to 1 gallon per cubic yard of media). The applications are based on the dry bulk density of the potting media. This application will provide a 6 month certification period when used in accordance with USDA guidelines.

Use proportional amounts of Bifenthrin Golf & Nursery 7.9F for potting media with bulk densities not listed.

Refer to the label for the specific Recommended Rates for Soil Incorporation in Potting Media.
