

# TURF

## General Information

### PRODUCT DESCRIPTION

Foursome is a unique formulation pigment additive designed to enhance and extend the aesthetic appearance of the turf site following a pesticide application and for use as a spray pattern indicator.

Foursome helps promote a uniform application of the pesticide, producing a more consistent turf response to the activity of the applied plant protectant.

### Limitations, Restrictions, and Exceptions

### TURF PIGMENT

For optimal performance, use from 15 to 20 oz. of Foursome per acre of turf with 16 oz. suggested as the initial rate.
