

HOSE - END SPRAYER

General Information

PHC BioPak enriches the soil profile with beneficial microbes which act as a sustainable fertility “system.” Once the microbes are in place in the root zone, they solubilize phosphorus, fix atmospheric nitrogen and can gradually improve soil tilth encourage healthy root growth. PHC BioPak:

- Increases organic content of the soil
- Increases the natural bioactivity in sterile or depleted soils
- Improves fertility in the root zone

Refer in the label regarding tank mix instructions.

Limitations, Restrictions, and Exceptions

HOSE - END SPRAYER

Add 1 cup of PHC BioPak into cartridge and spray over 10,000 square feet of lawn or 5000 square feet of flower bed. Follow with water to wash product into the root zone. Mixed solution should be used within a 12 hour period.

After application, rinse water through system to clear all product from the lines.
