

IN - LINE SYSTEMS - DOSATRON

General Information

PHC BioPak enriches the soil profile with beneficial microbes which act as a sustainable fertility “system.” Once the microbes are in place in the root zone, they solubilize phosphorus, fix atmospheric nitrogen and can gradually improve soil tilth encourage healthy root growth. PHC BioPak:

- Increases organic content of the soil
- Increases the natural bioactivity in sterile or depleted soils
- Improves fertility in the root zone

Refer in the label regarding tank mix instructions.

Limitations, Restrictions, and Exceptions

IN - LINE SYSTEMS - DOSATRON

Frequency of Application: Every 2 to 4 weeks
