

# TREES, SHRUBS, PERENNIALS, VINES, AND LANDSCAPE PLANTINGS

## General Information

PHC Plant Saver 4-7-4 is a sophisticated planting product used in establishing or maintaining most plants, including: trees, shrubs, annuals and perennials. It contains a blend of ecto and endomycorrhizal fungal spores, beneficial rhizosphere bacteria, 4-7-4 fertilizer, organic amendments, and a comprehensive selection of micronutrients designed to restore soil fertility and address themineral requirements common to many plants. Plant Saver also contains Myconate, a naturally occurring stimulant of VA mycorrhizal fungi. PHC Plant Saver:

- Provides a sustainable supply of nitrogen, phosphorus and other basic minerals necessary for continuing active plant development
- Increases absorption and transfer of water and mineral nutrients from the soil to the plant
- Helps plants mitigate adverse environmental conditions, such as drought, soil salinity and extremes of soil pH

## Limitations, Restrictions, and Exceptions

### TREES, SHRUBS, PERENNIALS, VINES, AND LANDSCAPE PLANTINGS

Thoroughly mix product into backfill at a rate of about 8 ounces of Plant Saver per caliper inch or for each foot diameter of root ball.

1. Mix Plant Saver evenly into the backfill soil next to the root ball in the upper 8-inches of the hole.
2. Pack the treated backfill firmly around the root ball.
3. Mulch and water to soil saturation.
