

TRANSPLANTS

General Information

PHC Plant Saver 4-7-4 is a sophisticated planting product used in establishing or maintaining most plants, including: trees, shrubs, annuals and perennials. It contains a blend of ecto and endomycorrhizal fungal spores, beneficial rhizosphere bacteria, 4-7-4 fertilizer, organic amendments, and a comprehensive selection of micronutrients designed to restore soil fertility and address the mineral requirements common to many plants. Plant Saver also contains Myconate, a naturally occurring stimulant of VA mycorrhizal fungi. PHC Plant Saver:

- Provides a sustainable supply of nitrogen, phosphorus and other basic minerals necessary for continuing active plant development
- Increases absorption and transfer of water and mineral nutrients from the soil to the plant
- Helps plants mitigate adverse environmental conditions, such as drought, soil salinity and extremes of soil pH

Limitations, Restrictions, and Exceptions

TRANSPLANTS

Refer to the chart in the label for options and specific application rates for transplants.
