

GRAPES & BERRIES

General Information

GENERAL INFORMATION

Microminor™ can be used in combination with water soluble plant nutritional products which are formulated for foliar, sidedress or drip irrigation application. May be applied alone or in tank mixes containing fertilizers, fungicides and/or pesticides. Microminor is believed to be compatible with most agricultural water-soluble plant nutritional products. If physical compatibility with another fertilizer product is unknown, use a jar compatibility test. The addition of calcium to the Microminor blend is recommended. When applying Microminor blend as a foliar spray, always use a spreader penetrant such as Widespread® Max.

ONCE PRODUCT IS DILUTED, USE WITHIN 24 HOURS

Limitations, Restrictions, and Exceptions

Grapes & Berries: 1-4 quarts/per acre. Apply as needed during periods of active growth.
