

## **GOLF COURSE FAIRWAYS - RED THREAD, ANTHRACNOSE ETC.**

### General Information

#### General Precautions and Restrictions:

- DO NOT apply this product in a way that will contact workers or other persons, or pets, either directly or through drift. Only protected handlers may be in the area during applications. For any requirements specific to your State or Tribe, consult the Agency responsible for pesticide regulation.

#### Limitations, Restrictions, and Exceptions

#### TURFGRASSES

- Do not use on home lawns and turf sites associated with apartment buildings, daycare centers, playgrounds, playfields, recreational park athletic fields, athletic fields located on or next to schools (i.e., elementary, middle and high schools), campgrounds, churches and theme parks. Sod farm turf treated with chlorothalonil prior to harvest must be mechanically cut, rolled and harvested. Do not apply more than the following totals of chlorothalonil active ingredient from all registered product sources to the indicated types of turfgrass: Do not use for sodfarms at application rates greater than 13 pounds of active ingredient, per acre, per year.

- Apply ArmorTech CLT 720 FL in 90 to 450 gallons of water per acre on golf course greens and tees, and 30 to 100 gallons of water per acre on fairways and lawns. Apply with ground equipment only.

- Begin applications when conditions favor disease development and repeat applications as long as these conditions persist. Under severe disease conditions use the highest rate and shortest interval corresponding with the application schedule selected from the table below. DO NOT mow or irrigate after treatment until spray deposit on turfgrass is thoroughly dry. ArmorTech CLT 720 FL should always be used in conjunction with good turf management practices.

INTERVAL OF APPLICATION : 7 to 14 days
